Validation Overview

The Centers for Medicare & Medicaid Services (CMS) requires that states, through their contracts with managed care organizations (MCOs), measure and report on performance to assess the quality and appropriateness of care and services provided to members. In accordance with the 2016 final rule as set forth in 42 CFR §438.330(c), states must require that MCOs, prepaid inpatient health plans (PIHPs), prepaid ambulatory health plans (PAHPs), and primary care case management (PCCM) entities submit performance measurement data as part of the MCOs', PIHPs', PAHPs', and PCCM entities' quality assessment and performance improvement programs. Validating performance measures is one of the mandatory external quality review (EQR) activities described in §438.358(b)(2). The purpose of performance measure validation (PMV) is to assess the accuracy of performance measure rates reported by the MCO and to determine the extent to which performance measures calculated by the MCO follow state specifications and reporting requirements. The state, its agent that is not an MCO, or an external quality review organization (EQRO) can perform this validation.

The Georgia Department of Community Health (DCH) is responsible for administering the Medicaid program and the Children's Health Insurance Program (CHIP) in the State of Georgia. The State refers to its CHIP program as PeachCare for Kids®. Both programs include fee-for-service (FFS) and managed care components and deliver services through a statewide provider network. The FFS program has been in place since the inception of Medicaid in Georgia. The DCH contracts with four privately owned managed care organizations, referred to by the State as care management organizations (CMOs), to deliver services to certain categories of members enrolled in the State's Medicaid and PeachCare for Kids® programs. Children in state custody, children receiving adoption assistance, and certain children in the juvenile justice system are enrolled in the Georgia Families 360° (GF 360°) managed care program. The Georgia Families (GF) program, implemented in 2006, serves all other Medicaid and PeachCare for Kids® managed care members not enrolled in the GF 360° program. Approximately 1.3 million beneficiaries are enrolled in the GF program.[1]

HSAG validated a set of performance measures identified by DCH that were calculated and reported by the CMOs for their GF population. The DCH identified the measurement period as calendar year (CY) 2018. HSAG conducted the validation in accordance with the CMS publication, *EQR Protocol 2: Validation of Performance Measures Reported by the MCO: A Mandatory Protocol for External Quality Review (EQR)*, Version 2.0, September 2012.[2]

Care Management Organization (CMO) Information

Basic information about Amerigroup Community Care (Amerigroup) appears in Table 1, including the office location(s) involved in the 2019 validation of performance measures audit that covered the CY 2018 measurement period.

Table 1—Amerigroup Community Care Information

CMO Name:	Amerigroup Community Care
CMO Location:	303 Perimeter Center North, Ste. 400, Atlanta, GA 30346
On-site Location:	5800 Northampton Blvd., Norfolk, VA 23502
Audit Contact:	Yvette Terry
Contact Telephone Number:	678.587.4852
Contact Email Address:	yvette.terry@amerigroup.com
Site Visit Date:	March 20–21, 2019

Performance Measures Validated

HSAG validated rates for the following set of performance measures selected by DCH for validation. All performance measures were selected from CMS' Core Set of Children's Health Care Quality Measures for Medicaid and CHIP (Child Core Set),[3] Core Set of Health Care Quality Measures for Adults Enrolled in Medicaid (Adult Core Set),[4] or the Agency for Healthcare Research and Quality's (AHRQ's) Quality Indicator measures. *Colorectal Cancer Screening*, a Healthcare Effectiveness Data and Information Set (HEDIS®)[5] non-Medicaid measure, was also included as part of HSAG's validation. The measurement period was identified by DCH as CY 2018 for all measures Table 2 lists the performance measures that HSAG validated, the method required by DCH for data collection, and the specifications the CMO was required to use for each of the measures.

[3] The Centers for Medicare & Medicaid Services. Core Set of Children's Health Care Quality Measures for Medicaid and CHIP, June 2016.

[4] The Centers for Medicare & Medicaid Services. Core Set of Health Care Quality Measures for Adults Enrolled in Medicaid, June 2016.

[5] HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

Table 2—List of CY 2018 Performance Measures for Amerigroup Community Care

	Performance Measure	Method	Specifications
1.	*Colorectal Cancer Screening**	Hybrid	Custom (HEDIS-modified)* HEDIS*
2.	*Developmental Screening in the First Three Years of Life*	Hybrid	Custom (Child Core Set-modified, Feb. 2018)** Child Core Set
3.	*Diabetes Short-Term Complications Admission Rate*	Admin	Adult Core Set (Feb. 2018) Adult Core Set
4.	*Heart Failure Admission Rate*	Admin	Adult Core Set (Feb. 2018) Adult Core Set
5.	*Live Births Weighing Less Than 2,500 Grams*	Admin	Custom (AHRQ-modified, Jun. 2018)*** Child Core Set
6.	*Percentage of Eligibles Who Received Preventative Dental Services* (reported at the county level [159 counties])	Admin	Child Core Set (Feb. 2018)****
7.	*Screening for Depression and Follow-Up Plan (Ages 12–17)*	Hybrid	Child core Set (Feb.2018), Adult Core Set (Feb. 2018)
8.	*Screening for Depression and Follow-Up Plan (Ages 18 and Older)*	Hybrid	Child Core Set (Feb. 2018), Adult Core Set (Feb. 2018)

*CMOs should follow the commercial HEDIS 2019 specification and apply to the Medicaid population.

**CMOs should use the Child Core Set dated February 2018 and apply the following modifications: All claims will have EP modifier 96110. CMOs must exclude claims that also have a UA modifier, as these indicate autism services.

***CMOs should follow the AHRQ specification dated June 2018, except will report the rate as a percentage and not per live births.

****CMO are required to report this rate for each Georgia Medicaid county (159 counties total).

In addition to the AHRQ and the CMS adult and child core set measures audited by HSAG, DCH required Amerigroup to report a selected set of HEDIS measures to DCH. Amerigroup was required to contract with a National Committee for Quality Assurance (NCQA)-licensed audit organization and undergo an NCQA HEDIS Compliance Audit™,[6]. Final audited HEDIS measure results from NCQA's Interactive Data Submission System (IDSS) were submitted to HSAG and provided to DCH.

[6] NCQA HEDIS Compliance Audit™ is a trademark of the National Committee for Quality Assurance (NCQA).

Appendix D displays the final audited HEDIS 2019 results for all required measures, covering the CY 2018 measurement period.

Description of Validation Activities

Pre-Audit Strategy

HSAG conducted the validation activities as outlined in the CMS PMV protocol. To complete the validation activities for Amerigroup, HSAG obtained a list of the performance measures that were selected by DCH for validation.

HSAG then prepared a document request letter that was submitted to Amerigroup outlining the steps in the PMV process. The document request letter included a request for source code for each performance measure; a completed HEDIS 2019 Information Systems Capabilities Assessment Tool (ISCAT) and any additional supporting documentation necessary to complete the audit. The letter also included an introduction to the medical record review validation (MRRV) process; a timetable for completion; and instructions for submission. HSAG responded to ISCAT-related questions received directly from Amerigroup during the pre-on-site phase.

Approximately one month prior to the on-site visit, HSAG provided Amerigroup with an agenda describing all on-site visit activities and indicating the type of staff needed for each session. HSAG also conducted a pre-on-site conference call with Amerigroup to discuss on-site logistics and expectations, important deadlines, outstanding Roadmap documentation, and any questions from Amerigroup regarding the process.

Validation Team

The HSAG Performance Measure Validation Team was composed of a lead auditor and several validation team members. HSAG assembled the team based on the skills required for the validation and requirements of Amerigroup. Some team members, including the lead auditor, participated in the on-site meetings at Amerigroup; others conducted their work at HSAG's offices. Table 3 lists the validation team members, their roles, and their skills and expertise.

Table 3—Validation Team

Name and Role	Skills and Expertise
Mariyah Badani, JD, MBA, CHCA *Director, Audits/State & Corporate Services; Secondary Auditor*	Management of the audit department; Certified HEDIS Compliance Auditor (CHCA); multiple years of auditing experience, data integration, systems review, and analysis.
Allen Iovannisci, MS, CHCA, CPHQ *Lead Auditor*	CHCA; performance measure knowledge, data integration, systems review, and analysis.

Name and Role	Skills and Expertise
Romy Franklin, MS *Audit Specialist, Audits/State & Corporate Services*	Assists with EQR performance measure validation and HEDIS audit-related projects through various stages, including implementation, project management, analysis, reports, orientation, and training.
Tammy Gianfrancisco *HEDIS Manager, Audits/State & Corporate Services*	Management of audit timelines and deliverables, source code review management, rate review management.
Sarah Lemley *Consultant, Source Code Reviewer*	Statistics, analysis, and source code/programming language knowledge.

Technical Methods of Data Collection and Analysis

The CMS PMV protocol identifies key types of data that should be reviewed as part of the validation process. The following list describes the type of data collected and how HSAG conducted an analysis of these data:

- **2019 ISCAT**: Amerigroup completed and submitted the required and relevant portions of its ISCAT for HSAG's review. HSAG used responses from the ISCAT to complete the pre-on-site assessment of information systems.
- **Medical record documentation:** Amerigroup completed the medical record section within the ISCAT. In addition, Amerigroup submitted the following documentation for review: medical record hybrid tools and instructions, training materials for medical record review (MRR) staff members, and policies and procedures outlining the processes for monitoring the accuracy of the reviews performed by the review staff members. To ensure the accuracy of the hybrid data being abstracted by the CMO, HSAG requested Amerigroup participate in the review of a convenience sample for selected hybrid measures.
- **Source code (programming language) for performance measures:** Amerigroup contracted with a software vendor, Inovalon, to generate and calculate rates for the performance measures under review by HSAG. The source code review was conducted via multiple web-assisted sessions where Inovalon displayed the source code for each measure and explained its rate generation and data integration processes to HSAG's source code review team.
- **Supporting documentation:** HSAG requested documentation that would provide reviewers with additional information to complete the validation process, including policies and procedures, file layouts, system flow diagrams, system log files, and data collection process descriptions. HSAG reviewed all supporting documentation, identifying issues or areas needing clarification for further follow-up.
- **Rate Review:** Upon receiving the calculated rates from Amerigroup, HSAG conducted a review on the reasonableness and integrity of the rates. The review included trending with prior rates and comparison of rates across all CMOs.

On-Site Activities

HSAG conducted an on-site visit with Amerigroup on March 20–21, 2019. HSAG collected information using several methods, including interviews, system demonstrations, review of data output files, primary source verification, observation of data processing, and review of data reports. The on-site visit activities are described as follows:

- **Opening meeting:** The opening meeting included an introduction of the validation team and key Amerigroup staff members involved in the PMV activities. The review purpose, the required documentation, basic meeting logistics, and queries to be performed were discussed.
- **Evaluation of system compliance:** The evaluation included a review of the information systems, focusing on the processing of claims and encounter data, provider data, patient data, and inpatient data. Additionally, the review evaluated the processes used to collect and calculate the performance measure rates, including accurate numerator and denominator identification and algorithmic compliance (which evaluated whether rate calculations were performed correctly, all data were combined appropriately, and numerator events were counted accurately).
- **Review of ISCAT and supporting documentation:** The review included processes used for collecting, storing, validating, and reporting performance measure rates. This session was designed to be interactive with key Amerigroup staff members so that HSAG could obtain a complete picture of all the steps taken to generate the performance measure rates. The goal of the session was to obtain a confidence level as to the degree of compliance with written documentation compared to actual processes. HSAG conducted interviews to confirm findings from the documentation review, expand or clarify outstanding issues, and ascertain that written policies and procedures were used and followed in daily practice.
- **Overview of data integration and control procedures:** The overview included discussion and observation of source code logic, a review of how all data sources were combined, and a review of how the analytic file was produced for the reporting of selected performance measure rates. HSAG performed primary source verification to further validate the output files, reviewed backup documentation on data integration, and addressed data control and security procedures. HSAG also reviewed preliminary rates during this session, if available.
- **Closing conference:** The closing conference included a summation of preliminary findings based on the review of the ISCAT and the on-site visit, and revisited the documentation requirements for any post-visit activities.

HSAG conducted several interviews with key Amerigroup staff members who were involved with performance measure reporting.

Table 4 displays a list of key Amerigroup interviewees:

Table 4—List of Amerigroup Community Care Interviewees

Name	Title
Dorothy De Los Santos	Manager, Business Change
Gail Brown	Program Consultant
Angela Evans	Program Consultant
Valerie Lewis	Manager, Credentialing
Debbie Murphy	Program Manager, Clinical Quality Management

Kendra Morgan	Enterprise Data Analyst
Amy Spaugh	Manager Business Systems
John Kucha	Systems Analyst II
Jason Isberto	System Analyst II
Kathleen King	Manager, Provider Relations

Data Integration, Data Control, and Performance Measure Documentation

There are several aspects crucial to the calculation of performance measure rates. These include data integration, data control, and documentation of performance measure rate calculations. Each of the following sections describes the validation processes used and the validation findings. For more detailed information, see Appendix A of this report.

Data Integration

Accurate data integration is essential for calculating valid performance measure rates. The steps used to combine various data sources (including claims/encounter data, eligibility data, and other administrative data) must be carefully controlled and validated. HSAG validated the data integration process used by Amerigroup, which included a review of file consolidations or extracts, a comparison of source data to warehouse files, data integration documentation, source code, production activity logs, and linking mechanisms. Overall, HSAG determined that the data integration processes in place at Amerigroup were:

☒ Acceptable
☐ Not acceptable

Data Control

Amerigroup's organizational infrastructure must support all necessary information systems; and its quality assurance practices and backup procedures must be sound to ensure timely and accurate processing of data, and to provide data protection in the event of a disaster. HSAG validated the data control processes Amerigroup used which included a review of disaster recovery procedures, data backup protocols, and related policies and procedures. Overall, HSAG determined that the data control processes in place at Amerigroup were:

☒ Acceptable
☐ Not acceptable

Performance Measure Documentation

Sufficient, complete documentation is necessary to support validation activities. While interviews and system demonstrations provided supplementary information, the majority of the validation review findings were based on documentation provided by Amerigroup. HSAG reviewed all related documentation, which included the completed Roadmap, job logs, computer programming code, output files, work flow diagrams, narrative descriptions of performance measure calculations, and other related documentation. Overall, HSAG determined that the documentation of performance measure rate calculations by Amerigroup was:

☒ Acceptable
☐ Not acceptable

Validation Results

HSAG evaluated Amerigroup's data systems for the processing of each data type used for reporting DCH performance measure rates. General findings are indicated below.

Medical Service Data (Claims and Encounters)

There were no changes to Amerigroup's medical service data processing/encounter capture. Amerigroup continued to use the Facets system to capture all FFS claims. The vast majority of claims were submitted electronically while only a small portion were submitted on paper. Amerigroup's paper and electronic claims processes were virtually identical, except that paper claims were required to be scanned by a vendor. All claims were subjected to pre-processing edits prior to being loaded into Facets. These pre-processing edits ensured the claims contained valid codes and valid member and provider information.

Amerigroup also captured pharmacy and laboratory services data provided by two external vendors, both of which regularly submitted data to Amerigroup. Amerigroup tracked and trended all incoming vendor data to ensure files were complete and record counts were as expected. The care management organization (CMO) also used supplemental data provided by its laboratory vendors to capture lab results.

HSAG reviewed each system and process associated with claims and encounters and had no concerns. Each system captured appropriate, standard coding schemes as required for reporting. Amerigroup only used standard claim forms for each service type (i.e., dental, professional, institutional, and pharmacy).

Amerigroup appropriately monitored vendor data submissions and controls regularly to ensure data completion for measure production. Amerigroup's oversight of this process ensured that all relevant data were captured prior to measure production.

When questioned about encounter files submitted to the State, Amerigroup indicated that all encounters, both paid and denied, were submitted to the State regularly. The only encounters withheld from reporting were those rejected back to the provider for corrections. Those encounters did not pass the pre-processing edits and therefore did not have a final disposition.

Amerigroup sent medical (professional, institutional inpatient, and institutional outpatient), dental, vision, and National Council for Prescription Drug Programs NCPDP (pharmacy) claims in the weekly encounter file to DXC. A subset of denied claims were not included in this weekly submission for reasons such as "wrong payee," "definite duplicate claim," and "non-compliant modifier." Amerigroup advised a 99 percent or greater claims acceptance rate from DXC/DCH for all encounters.

HSAG did not have any concerns with Amerigroup's claims and encounter data processing.

Enrollment Data

There were no changes to the enrollment data capture and system used to house enrollment data since the previous review. Amerigroup received the State enrollment files daily and monthly and loaded them into Facets. Using the aid codes provided on the enrollment files, Amerigroup was able to identify and separate the GF 360° population from the Community Care population when reporting on each measure. HSAG and Amerigroup confirmed that no Planning for Healthy Babies® (P4HB®) data were captured in any of the membership being reported.

HSAG verified the aid codes and populations during the on-site audit and conducted primary source verification of distinct members to ensure the populations were separated.

Amerigroup's Facets system captured all relevant fields from the State's enrollment files and continued to monitor daily file updates, cancellations, and renewals.

Members with duplicate identifiers were merged into a single record based on the State's most recent identification number. The duplicate member identifier only occurred with newborns and was quickly resolved at Amerigroup. Claims processed under the original identifier were linked to the new identifier.

HSAG did not have any concerns with Amerigroup's enrollment process.

Provider Data

Although provider data did not represent a concern for the measures under review, HSAG conducted a thorough review of Amerigroup's provider data capture. Amerigroup's provider system remained unchanged since the previous review. Amerigroup used the CACTUS (credentialing) and Facets (billing and payment) systems to store its provider data. The CMO had a systematic process to capture, review, and update provider credentialing and specialty data in both systems. The two systems were linked using Facets' common practitioner identifiers, and changes in provider data from Facets were automatically loaded into CACTUS, eliminating any potential manual data entry or merge errors. Amerigroup implemented daily, weekly, and monthly edit checks on provider data submitted via claims. Additionally, the CMO's audit team reviewed 25 percent of all completed records for accuracy and completeness each month. Amerigroup's oversight of its delegates contracted for credentialing and recredentialing activities also met industry standards.

The State implemented a centralized credentials verification organization (CVO), and all credentialing functions were handled by the State CVO.

HSAG conducted primary source verification of the CACTUS and Facets systems to identify any issues across the two systems. HSAG also reviewed a sample of provider specialties to ensure the specialties matched the credentialed providers' education and board certification. HSAG found Amerigroup to be compliant with the credentialing and assignment of individual provider specialties in both systems.

HSAG staff reviewed and approved Amerigroup's provider specialty mapping and determined it to be compliant for performance measure reporting.

HSAG did not have any concerns with Amerigroup's provider data processing.

Medical Record Review Validation (MRRV)

Table 5—MRRV Results for Amerigroup Community Care

Performance Measure	Initial Sample Size	Findings	Follow-Up	Final Results
Colorectal Cancer Screening	7	No concerns	None	R
Developmental Screening in the First Three Years of Life	16	No concerns	None	R
Screening for Depression and Follow-Up Plan (Ages 12–17)	16	No concerns	None	R
Screening for Depression and Follow-Up Plan (Ages 18 and Older)	16	No concerns	None	R

Supplemental Data

Supplemental data were not evaluated under the scope of the PMV audit.

Data Integration

Amerigroup continued to use its internal relational database to store all incoming data. The internal data warehouse contained both internal and external data files used for reporting. Amerigroup also contracted with a vendor, Inovalon, to produce the performance measures under review.

Amerigroup was responsible for loading and running the data monthly, as well as running the data for measure production and final rates. HSAG conducted primary source verification on *Colorectal Cancer Screening*, *Developmental Screening in the First Three Years of Life*, and *Live Births Weighing Less Than 2,500 Grams* measures. HSAG had no concerns following the review of these measures. All measures passed primary source verification.

Amerigroup maintained its quality review processes during the measurement year to ensure all data were loaded. Amerigroup continued to conduct monthly data runs for measures to monitor progress throughout the year, a best practice for ensuring accurate data management and measure production. Monthly measure production continued to assist Amerigroup with identifying any issues early. If data errors were found, Amerigroup was able to easily retract and reload the data to correct the issues.

Amerigroup continued to have an excellent disaster recovery process in place and backed up data nightly.

HSAG conducted rate review on the measure under the scope of the audit, and all rates were reportable.

The *Low Birth Weight* measure (PQI-09) requires a rate per 1,000 members. The DCH indicated that it did not want to report this measure as a rate per 1,000 members but rather as a percentage and broken out by county.

Performance Measure Specific Findings

Based on all validation activities, HSAG determined validation results for each performance measure rate. HSAG provided an audit result for each performance measure as defined in Table 6.

Table 6—Audit Results and Definitions for Performance Measures

Reportable (R)	The CMO followed the State's specifications and produced a reportable rate or result for the measure.
Not Reportable (NR)	The calculated rate was materially biased.
Not Applicable (NA)	The CMO followed the State's specifications, but the denominator was too small (<30) to report a valid rate.

According to the CMS protocol, the audit result for each performance measure rate is determined by the magnitude of the errors detected for the audit elements, not by the number of audit elements determined to be "Not Reportable." It is possible for a single audit element to receive an audit result of "NR" when the impact of the error associated with that element biased the reported performance measure rate more than 5 percentage points. Conversely, it is also possible that several audit element errors may have little impact on the reported rate, leading to an audit result of "R."

Table 7 displays the key review findings and final audit results for Amerigroup for each performance measure rate. For additional information regarding performance measure rates, see Appendix C of this report.

Table 7—Key Review Findings and Audit Results for Amerigroup Community Care

Performance Measures		Key Review Findings	Audit Results
1.	*Colorectal Cancer Screening*	No concerns	R
2.	*Developmental Screening in the First Three Years of Life*	No concerns	R
3.	*Diabetes Short-Term Complications Admission Rate*	No concerns	R
4.	*Heart Failure Admission Rate*	No concerns	R

	Performance Measures	Key Review Findings	Audit Results
5.	*Live Births Weighing Less Than 2,500 Grams*	No concerns	R
6.	*Percentage of Eligibles Who Received Preventive Dental Services* (reported at the county level [159 counties])	No concerns	R
7.	*Screening for Depression and Follow-Up Plan (Ages 12–17)*	No concerns	R
8.	*Screening for Depression and Follow-Up Plan (Ages 18 and Older)*	No concerns	R

HSAG HEALTH SERVICES ADVISORY GROUP

Appendix A. Data Integration and Control Findings

Documentation Worksheet

CMO Name:	Amerigroup Community Care
On-Site Visit Date:	March 20–21, 2019
Reviewers:	Allen Iovannisci, MS, CHCA, CPHQ

Table A-1—Data Integration and Control Findings for Amerigroup Community Care

Data Integration and Control Element	Met	Not Met	N/A	Comments
Accuracy of data transfers to assigned performance measure data repository.				
The CMO accurately and completely processes transfer data from the transaction files (e.g., membership, provider, encounter/claims) into the performance measure data repository used to keep the data until the calculations of the performance measure rates have been completed and validated.	☒	☐	☐	No concerns
Samples of data from the performance measure data repository are complete and accurate.	☒	☐	☐	No concerns
Accuracy of file consolidations, extracts, and derivations.				
The CMO's processes to consolidate diversified files and to extract required information from the performance measure data repository are appropriate.	☒	☐	☐	No concerns
Actual results of file consolidations or extracts are consistent with those that should have resulted according to documented algorithms or specifications.	☒	☐	☐	No concerns
Procedures for coordinating the activities of multiple subcontractors ensure the accurate, timely, and complete integration of data into the performance measure database.	☒	☐	☐	No concerns
Computer program reports or documentation reflect vendor coordination activities, and no data necessary for performance measure reporting are lost or inappropriately modified during transfer.	☒	☐	☐	No concerns
If the CMO uses a performance measure data repository, its structure and format facilitates any required programming necessary to calculate and report required performance measure rates.				
The performance measure data repository's design, program flow charts, and source codes enable analyses and reports.	☒	☐	☐	No concerns

Data Integration and Control Element	Met	Not Met	N/A	Comments
Proper linkage mechanisms are employed to join data from all necessary sources (e.g., identifying a member with a given disease/condition).	☒	☐	☐	No concerns
Assurance of effective management of report production and of the reporting software.				
Documentation governing the production process, including CMO production activity logs and the CMO staff review of report runs, is adequate.	☒	☐	☐	No concerns
Prescribed data cutoff dates are followed.	☒	☐	☐	No concerns
The CMO retains copies of files or databases used for performance measure reporting in case results need to be reproduced.	☒	☐	☐	No concerns
The reporting software program is properly documented with respect to every aspect of the performance measure data repository, including building, maintaining, managing, testing, and report production.	☒	☐	☐	No concerns
The CMO's processes and documentation comply with the CMO standards associated with reporting program specifications, code review, and testing.	☒	☐	☐	No concerns

Appendix B. Denominator and Numerator Validation Findings

Reviewer Worksheets

CMO Name:	Amerigroup Community Care
On-Site Visit Date:	March 20–21, 2019
Reviewers:	Allen Iovannisci, MS, CHCA, CPHQ; Mariyah Badani, JD, MBA, CHCA

Table B-1—Denominator Validation Findings for Amerigroup Community Care

Audit Element	Met	Not Met	N/A	Comments
For each of the performance measures, all members of the relevant populations identified in the performance measure specifications are included in the population from which the denominator is produced.	☒	☐	☐	No concerns
Adequate programming logic or source code exists to appropriately identify all relevant members of the specified denominator population for each of the performance measures.	☒	☐	☐	No concerns
The CMO correctly calculates member months and member years if applicable to the performance measure.	☒	☐	☐	No concerns
The CMO properly evaluates the completeness and accuracy of any codes used to identify medical events, such as diagnoses, procedures, or prescriptions, and these codes are appropriately identified and applied as specified in each performance measure.	☒	☐	☐	No concerns
If any time parameters are required by the specifications of the performance measure, they are followed (e.g., cutoff dates for data collection, counting 30 calendar days after discharge from a hospital).	☒	☐	☐	No concerns
Exclusion criteria included in the performance measure specifications are followed.	☒	☐	☐	No concerns
Systems or methods used by the CMO to estimate populations when they cannot be accurately or completely counted (e.g., newborns) are valid.	☐	☐	☒	Not applicable

Table B-2—Numerator Validation Findings for Amerigroup Community Care

Audit Element	Met	Not Met	N/A	Comments
The CMO uses the appropriate data, including linked data from separate data sets, to identify the entire at-risk population.	☒	☐	☐	No concerns
Qualifying medical events (such as diagnoses, procedures, prescriptions, etc.) are properly identified and confirmed for inclusion in terms of time and services.	☒	☐	☐	No concerns
The CMO avoids or eliminates all double-counted members or numerator events.	☒	☐	☐	No concerns
Any nonstandard codes used in determining the numerator are mapped to a standard coding scheme in a manner that is consistent, complete, and reproducible, as evidenced by a review of the programming logic or a demonstration of the program.	☐	☐	☒	Nonstandard codes were not used
If any time parameters are required by the specifications of the performance measure, they are followed (i.e., the measured event occurred during the time period specified or defined in the performance measure).	☒	☐	☐	No concerns

Appendix C. Performance Measure Rate Submission File

Appendix C contains Amerigroup Community Care's final audited performance measure rate submission file.

State Fiscal Year (SFY) 2019 Performance Measure Data Submission for Georgia Care Management Organizations (CMOs)

Population: Medicaid Georgia Families (GF)

Reporting Year: SFY 2019/Measurement Period: Calendar Year (CY) 2018

Colorectal Cancer Screening (COL)

Data Element	General Measure Data
Reporting year	**SFY 2019**
Measurement period	**CY 2018**
Data collection methodology	**H**
Eligible population	875
Number of numerator events by administrative data in eligible population (before exclusions)	335
Current year's administrative rate (before exclusions)	38.29%
Minimum required sample size (MRSS)	
Oversampling rate	
Number of oversample records	
Number of numerator events by administrative data in MRSS	
Administrative rate on MRSS	
Number of original sample records excluded because of valid data errors	0
Number of administrative data records excluded	0
Number of medical records excluded	0
Number of employee/dependent medical records excluded	0
Records added from the oversample list	0
Denominator	411
Numerator events by administrative data	158
Numerator events by medical records	7
Numerator events by supplemental data	4
Reported rate	41.12%

Developmental Screening in the First Three Years of Life (DEV-CH)

Data Element	General Measure Data	Age 1	Age 2	Age 3	Total (Ages 1-3)
Reporting Year	**SFY 2019**				
Measurement period	**CY 2018**				
Data collection Methodology	**H**				
Eligible population		137	137	137	411
Denominator		137	137	137	411
Numerator events by administrative data		71	82	70	223
Numerator events by medical records		3	4	9	16
Numerator total		74	86	79	239
Reported rate		54.01%	62.77%	57.66%	58.15%

Diabetes Short-Term Complications Admission Rate (PQI-01)				
Data Element	**General Measure Data**	**Ages 18-64**	**Ages 65+**	**All Ages**
Reporting year	**SFY 2019**			
Measurement period	**CY 2018**			
Data collection methodology	**A**			
Eligible population (total member months)		813,383	96	813,479
Numerator events by administrative data		94	0	94
Reported rate (per 100,000 member months)		11.56	0.00	11.56

Heart Failure Admission Rate (PQI-08)

Data Element	General Measure Data	Ages 18-64	Ages 65+	All Ages
Reporting year	**SFY 2019**			
Measurement period	**CY 2018**			
Data collection methodology	**A**			
Eligible population (total member months)		813,383	96	813,479
Numerator events by administrative data		38	0	38
Reported rate (per 100,000 member months)		4.67	0.00	4.67

Note: CMS requires to report ages 18-64 and 65+ only.

Live Births Weighing Less Than 2,500 Grams (PQI-09)

Note: Measure was reported according to the AHRQ specification; however, the state requires the rate to be reported as a percentage, not per live births.
