INSTRUCTIONS FOR X-RAY REGISTRATION

In accordance with the Radiation Control Act, Chapter 31-13 of the Official Code of Georgia Annotated, and the Rules and Regulations for X-Ray, Chapter 290-5-22, users of radiation machines are required to be registered with the Department prior to the operation of X-ray equipment in Georgia. An approved registration requires submission of a registration application, an approved shielding design, and an initial inspection.

The Department will acknowledge receipt of all relevant materials. Disapproved shielding designs will be returned for modification. Facility registration is not transferable, however an approved shielding design for a specified facility may be used by a subsequent owner for registration purposes, provided x-ray use is within specified conditions. Relocations require a new application, shielding design and an initial inspection.

Be advised that: A FACILITY MAY NOT OPERATE X-RAY MACHINES UNTIL AN INITIAL INSPECTION IS DONE. FAILURE TO REGISTER YOUR MACHINES IN ACCORDANCE WITH REGULATIONS WILL CAUSE YOU TO BE SUBJECT TO CIVIL MONEY PENALTIES NOT TO EXCEED $1,000.00 OR DENIAL OF REGISTRATION OR BOTH. Due to a backlog of inspections, the X-ray Unit is approximately six weeks behind in completing initial inspections. If you wish to operate the X-ray equipment sooner, you may opt to have an individual qualified at §§ 290-5-22-.02(1)(d) and .02(4) to perform the initial inspection at your own expense.

Enclosed is a package of information that contains forms and materials that you are required to submit to this Office within (30) days. The materials included are:

- 2. Shielding Design Format Requirements with example
- 3. Reportable Incidents Instruction
- 4. Initial Inspection Report

Any questions concerning the requirements in this letter may be addressed by calling 404-657-5400. To aid you in completing the forms, directions are enclosed in your packet.
PERSONAL IDENTIFICATION REQUIREMENTS

All applications for state licensure and registration submitted after March 1, 2006 will require a notarized personal identification affidavit. This affidavit is for your X-ray facility. Please see the attached affidavit and list of documents that establish identity.

The application, shielding design and affidavit must be mailed together. Please do not fax. This will delay the registration process.

Please mail the original to:

INSTRUCTIONS FOR COMPLETING AFFIDAVIT
REQUIRED TO BECOME LICENSED

In order to obtain a license from the Department of Community Health to operate your business, Georgia law requires every applicant to complete an affidavit (sworn written statement) before a Notary Public that establishes that you are lawfully present in the United States of America. This affidavit is a material part of your application and must be completed truthfully. Your application for licensure may be denied or your license may be revoked by the Department if it determines that you have made a material misstatement of fact in connection with your application to become licensed. If a corporation will be serving as the governing body of the licensed business, the individual who signs the application on behalf of the corporation is required to complete the affidavit. Please follow the instructions listed below.

1. Review the list of Secure and Verifiable Documents under O.C.G.A. §50-36-2 which follows these instructions. This list contains a number of identification sources to choose from that are considered secure and verifiable that you can use to establish your identity, such as a U.S. driver’s license or a U.S. passport. Locate one original document on the list to bring to the Notary Public to establish your identity.

2. Print out the affidavit. (If you do not have access to a printer, you can go to your local library or an office supply store to print out the document for a small fee.)

3. Fill in the blanks on the Affidavit above the signature line only—BUT DO NOT SIGN THE AFFIDAVIT at this time. (You will sign the affidavit in front of the Notary Public.) Fill in the name of the secure and verifiable document (for example, Georgia driver’s license, U.S. passport) that you will be presenting to the Notary Public as proof of your identity. CAUTION: Put your initials in front of only ONE of the choices listed on the affidavit and described here below:

   • Option 1) is to be initialed by you if you are a United States citizen; or

   • Option 2) is to be initialed by you if you are a legal permanent resident of the United States. You are not a U.S. citizen but you have a green card; or

   • Option 3) is to be initialed by you if you are a qualified alien or non-immigrant (but not a U.S. citizen or a legal permanent resident) with an alien number issued by the Department of Homeland Security or other federal immigration agency. Fill in the alien number, as well.

4. Find a Notary Public in your area. Check the yellow pages, the internet or with a local business, such as a bank.

5. Bring your affidavit and the identification you selected (from the list of Secure and Verifiable Documents) to appear before the Notary Public.
6. Show the Notary Public your secure and verifiable identification (anything on List that follows these instructions) and state under oath in the presence of the Notary Public that you are who you say you are and that you are in the United States lawfully. Then sign your name.

7. Make certain that the Notary Public signs and dates the affidavit and puts when the notary commission expires.

8. Make a copy of the affidavit and the identification that you presented to the Notary Public for your own records.

9. Attach the ORIGINAL SIGNED AFFIDAVIT and a copy of the identification you presented to your application for licensure. DO NOT SEND US YOUR AFFIDAVIT SEPARATELY. IT MUST BE INCLUDED IN THE COMPLETE APPLICATION PACKET WHICH YOU MAIL TO US.

INSTRUCTIONS FOR COMPLETING SHIELDING DESIGN SPECIFICATIONS

Before Starting Form Look At Sample Drawing:

1. Prepare a scale drawing of your x-ray suite. Be sure to indicate locations of all doors and windows, operator's area, and darkroom, including film storage.

2. Label all barriers alphabetically starting in the upper left corner of the room.

3. Indicate use of adjacent area outside each barrier.

4. The travel and traverse limits of the x-ray tube should be indicated, if applicable. Travel is defined as the long dimension of movement and traverse as the short dimension. Be sure to show travel and traverse on your drawing.

Completing the Shielding Design Specification Forms:

1. Complete applicant and facility information on top portion of form. Use one form for each room or x-ray machine. Include mailing address if different.

2. Indicate use of machine. This would be the type of examination or treatment performed using the machine.

3. Design workload. State either the milliamp-minutes per week at 100 kVp or estimate the number of exposures that will be made during an average one week period.

4. Indicate maximum exposure time, kVp setting, and maximum milliamp setting anticipated under usual operating techniques.

6. Column 2. Distance from X-ray tube to barrier.

Indicate whether the barrier is a primary or secondary radiation barrier. A primary barrier is defined as a barrier toward which the x-ray beam could be directed. All other barriers are secondary barriers.
(8.) Column 4. Identify use of adjacent area outside this barrier.

(9.) Column 5. Controlled or Non-controlled Area.

The areas outside the x-ray room are either controlled access areas or non-controlled access areas. A controlled area is a defined area in which the exposure of persons to radiation is under the supervision of a Radiation Protection Supervisor. This implies that the controlled area is one that requires control of access, occupancy, and working conditions for radiation protection purposes.

Areas which are not part of the Radiology Department or suite should not be declared controlled for the purpose of permitting reduction in degree of protection of occupants. Areas within the Department or suite which are not directly related to the use of radiation sources should not be declared controlled areas.

Any space not meeting the definition of a controlled area is a non-controlled area.

(10.) Column 6. Construction Material and Thickness.

In order for Department staff to evaluate your shielding design, the construction materials and thicknesses of these materials at each barrier must be known. Be sure to include windows and doors.

As an example - for wall AB in our sample x-ray room there are two sheets of dry wall, each 2 inches thick. (Do not include studs and space between.)

In another example, the floor area which is located over a storage room is 2.5 inches of 147 pound concrete.

The addition of lead or other materials to reduce radiation exposure below regulatory requirements is to be indicated here. The amount of lead or lead equivalent material required can be calculated by using NCRP report 147.

Reportable Incidents

This form is designed for notifying the Health Care Facility Regulation Division (HFRD) of reportable sentinel incidents and for the action taken by the facility to identify and address any opportunity to improve care/procedures related to the incident. A separate letter to notify HFRD of such incidents is NOT required.

Directions for completing the X-RAY Incident Reporting Form

Please type or print the information. Be as complete as you can: complete information may allow our staff to review the incident without contacting you for more information. Use a separate report for each incident. Overexposure of a patient is one event; high count film badges of unknown exposure origin are a separate incident.

What should be reported?

1. Any unanticipated patient death/severe harm due to excessive radiation.
2. Misidentification of X-rays resulting in unnecessary surgery leading to problems that could have or did cause a health threat to the patients

These are examples and are not meant to be an exhaustive list of reportable events.

Facility Information:
Include the name, address, phone number, fax number, and e-mail address of the facility. The license/registration number is found on your facility license/certificate. The contact person(s) listed will be the person(s) HFRD will contact should a follow-up phone call be needed.

Reporting Information:
Record the date and time the incident occurred, the date and time you became aware of the incident, and the date and time you are reporting the incident to HFRD, circling am or pm. Check which event you are reporting on the form or hand write it.

Summary of Incident:
Provide a brief summary of the reportable incident: describe what happened, who was involved (i.e. RT, CRTT, X-ray operator, phlebotomist, RN etc.) and what action was taken at the time of the event. For example:

“The operator took x-rays of the wrong patient because the patient chart was actually another patient’s.”

Immediate Corrective or Preventive Action Taken:
Provide a brief narrative of your evaluation of the actions taken in regard to the incident. Include any action you will take as a result of this review, which could include but is not limited to: in-service & monitoring, revision of policy/procedure, development of policy/procedure, no action required, etc.

Sign and date the form and print your name and title. Return the form via fax to (404) 657-5442. Do not put any information in the box entitled “For Department Use Only”.

Thank you for your cooperation.
