

Georgia Rural Health Safety Net Phase II

Questions and Answers, Received as of August 27, 2008

Q. 1 We have received several inquiries from our community partners about whether we think the Phase II funding is in jeopardy with the recent state budget woes. If the Department knows that this line item will be under the knife, will they let us know as soon as that determination is made?

R. 1 All projects are at risk of funding availability; however, staff has been instructed to proceed. As definitive information becomes available, all potential applicants will be immediately notified.

Q.2 In previous presentations, DCH requested the budget to reflect the entire grant period (through June 20, 2011, as you clarified in a previous response). Can you clarify for all whether you want the budget broken out by year in the narrative or whether it too should be for the entire project period?

R. 2 The narrative budget can be for the entire project period. However we need to know the funds required by grant year since our state funds are being provide in the State FY 09 budget and FY 10 budget; so please provide a line item budget by year. The line item budgets will total and match the funds in the budget narrative. The work plan should illustrate the progression of the project.
