30179	30180
30182	30187

DCH will consider proposals that present compelling and viable models for Special Health Focus Service Areas within the PACE service areas previously discussed. Such proposals should seek opportunities to present PACE models based on population values and characteristics that could offer better optimization of and approach to the community-focused-concepts of PACE. All Special Health Focus Service Area proposals must include:

- All requirements in the RFP solicitation
- A detailed financial viability analysis
- A feasibility study and a business plan that supports the submitter's proposal to establish a Special Health List of contiguous ZIP codes that the submitter intends to serve as part of the Special Health Services Focus Area
- A rationale for creation of the Special Health Services Focus Area, including an explanation of what unique aspects of the population can be served/addressed
- A detailed explanation of how the organization will accommodate and support participants who enroll, but who do not identify as part of the Special Health Services Focus Group
