Re: Title XIX State Plan Amendment, GA 13-0028-MM7

Dear Mr. Reese:

Enclosed is an approved copy of Georgia’s State Plan Amendment (SPA) 13-0028-MM7, which was originally submitted to the Centers for Medicare & Medicaid Services (CMS) on January 9, 2014. SPA 13-0028-MM7 establishes that one or more qualified hospitals are determining presumptive eligibility, and that the state is providing coverage for individuals determined presumptively eligible, in accordance with the Affordable Care Act. The SPA was approved on February 6, 2015. The effective date of this SPA is January 1, 2014.

We understand that the state is still in the process of finalizing its system to support hospital presumptive eligibility and is estimating an implementation date of February 26, 2015. If any systems or other issues threaten this date, the state should inform CMS as soon as possible.

Enclosed is a copy of the new state plan pages and attachments to be incorporated within a separate section at the back of Georgia’s approved state plan.

If you have any questions, please contact Ms. Tandra Hodges of my staff at 404-562-7409.

Sincerely,

Jackie Glaze
Associate Regional Administrator
Division of Medicaid & Children's Health Operations

Presumptive Eligibility by Hospitals

42 CFR 435.1110

One or more qualified hospitals are determining presumptive eligibility under 42 CFR 435.1110, and the state is providing Medicaid coverage for individuals determined presumptively eligible under this provision.

☐ Yes  ☐ No

☑ The state attests that presumptive eligibility by hospitals is administered in accordance with the following provisions:

☐ A qualified hospital is a hospital that:

- Participates as a provider under the Medicaid state plan or a Medicaid 1115 Demonstration, notifies the Medicaid agency of its election to make presumptive eligibility determinations and agrees to make presumptive eligibility determinations consistent with state policies and procedures.

- Has not been disqualified by the Medicaid agency for failure to make presumptive eligibility determinations in accordance with applicable state policies and procedures or for failure to meet any standards that may have been established by the Medicaid agency.

- Assists individuals in completing and submitting the full application and understanding any documentation requirements.

☐ Yes  ☐ No

☐ The eligibility groups or populations for which hospitals determine eligibility presumptively are:

☐ Pregnant Women

☐ Infants and Children under Age 19

☐ Parents and Other Caretaker Relatives

☐ Adult Group, if covered by the state

☐ Individuals above 133% FPL under Age 65, if covered by the state

☐ Individuals Eligible for Family Planning Services, if covered by the state

☐ Former Foster Care Children

☐ Certain Individuals Needing Treatment for Breast or Cervical Cancer, if covered by the state

☐ Other Family/Adult groups:

☐ Eligibility groups for individuals age 65 and over

☐ Eligibility groups for individuals who are blind

☐ Eligibility groups for individuals with disabilities

☐ Other Medicaid state plan eligibility groups

☐ Demonstration populations covered under section 1115

The state establishes standards for qualified hospitals making presumptive eligibility determinations.

Yes  No

Select one or both:

☒ The state has standards that relate to the proportion of individuals determined presumptively eligible who submit a regular application, as described at 42 CFR 435.907, before the end of the presumptive eligibility period.

Qualified Hospital PE Performance Standards will be established at the end of the first (6) months.
The Department of Community Health (DCH) will review all Qualified Hospital (QH) Presumptive Eligibility (PE) determinations for the first six months before establishing specific performance standards.

This time period will allow DCH to eliminate any potential barriers to providing QH's with the proper tools to determine PE applications correctly and timely.

Base targets on data gathered during the initial implementation:
Georgia will look at the share of PE applicants who file a full application and are found eligible for regular Medicaid at the end of the six month review period, identify the average or median outcome on this measure, and use it to set the target for hospitals in 2015. There is an indicator on our hospital presumptive application so that we can monitor that a full Medicaid application was offered and completed.

Increasing benchmarks over time:
Georgia will start with a modest target accuracy but then increase it by five percentage points (or more) in future years.

Description of standards:

Percent of PE determinations conducted accurately:
Georgia will require that 90 percent of a hospital's PE determinations be done correctly based on the information that an applicant has provided. If an applicant provides misinformation, his or her circumstances change, or his or her information cannot be verified, it would not affect a hospital's performance on the accuracy measure.

Percent of applicants checked for existing Medicaid enrollment:
Hospitals would be required to ensure that 100 percent of potential applicants are checked for existing enrollment in Medicaid before a PE determination is conducted. A screening function is built into the web portal.

Percent of applicants checked for prior PE enrollment:
Hospitals would be required to ensure that 95 to 100 percent of potential applicants are checked for recent PE determinations (e.g., with the exception of pregnant women, not enrolled in PE within prior 2 calendar years) before a new PE determination is conducted on their behalf. Hospitals would be trained to identify PE eligibility.

Qualified Hospitals may be disqualified from conducting PE determinations for failure to adhere to the above standards or the state's policies and procedures.

☐ The state has standards that relate to the proportion of individuals who are determined eligible for Medicaid based on the submission of an application before the end of the presumptive eligibility period.

☐ The presumptive period begins on the date the determination is made.

☐ The end date of the presumptive period is the earlier of:

The date the eligibility determination for regular Medicaid is made, if an application for Medicaid is filed by the last day of the month following the month in which the determination of presumptive eligibility is made; or

Medicaid Eligibility

The last day of the month following the month in which the determination of presumptive eligibility is made, if no application for Medicaid is filed by that date.

- Periods of presumptive eligibility are limited as follows:
  - No more than one period within a calendar year.
  - No more than one period within two calendar years.
  - No more than one period within a twelve-month period, starting with the effective date of the initial presumptive eligibility period.
- Other reasonable limitation:

The state requires that a written application be signed by the applicant, parent or representative, as appropriate.

- Yes  - No

- The state uses a single application form for Medicaid and presumptive eligibility, approved by CMS.
- The state uses a separate application form for presumptive eligibility, approved by CMS. A copy of the application form is included.

An attachment is submitted.

The presumptive eligibility determination is based on the following factors:

- The individual’s categorical or non-financial eligibility for the group for which the individual’s presumptive eligibility is being determined (e.g., based on age, pregnancy status, status as a parent/caretaker relative, disability, or other requirements specified in the Medicaid state plan or a Medicaid 1115 demonstration for that group)

- Household income must not exceed the applicable income standard for the group for which the individual’s presumptive eligibility is being determined, if an income standard is applicable for this group.

- State residency
- Citizenship, status as a national, or satisfactory immigration status

The state assures that it has communicated the requirements for qualified hospitals, and has provided adequate training to the hospitals. A copy of the training materials has been included.
