Announcement for mayors, city council members & other community leaders:

The Department of Community Health (DCH) announces expansion opportunities for free medical and dental care with the Georgia Volunteer Health Care Program (GVHCP).

- Do you want to see improved health outcomes for those who lack quality access to care in your city or town?
- Are you aware of licensed health care professionals who would like to see better health care for the underserved community?
- Would they be interested in earning their required Continuing Education (C.E.) credits for volunteering?
- Is there a church, recreation center, or community center in your area that could house a clinic or lend or share office space to deliver care?
- Did you know that the GVHCP has free governmental malpractice for clinical providers who deliver care to the program's eligible patients?
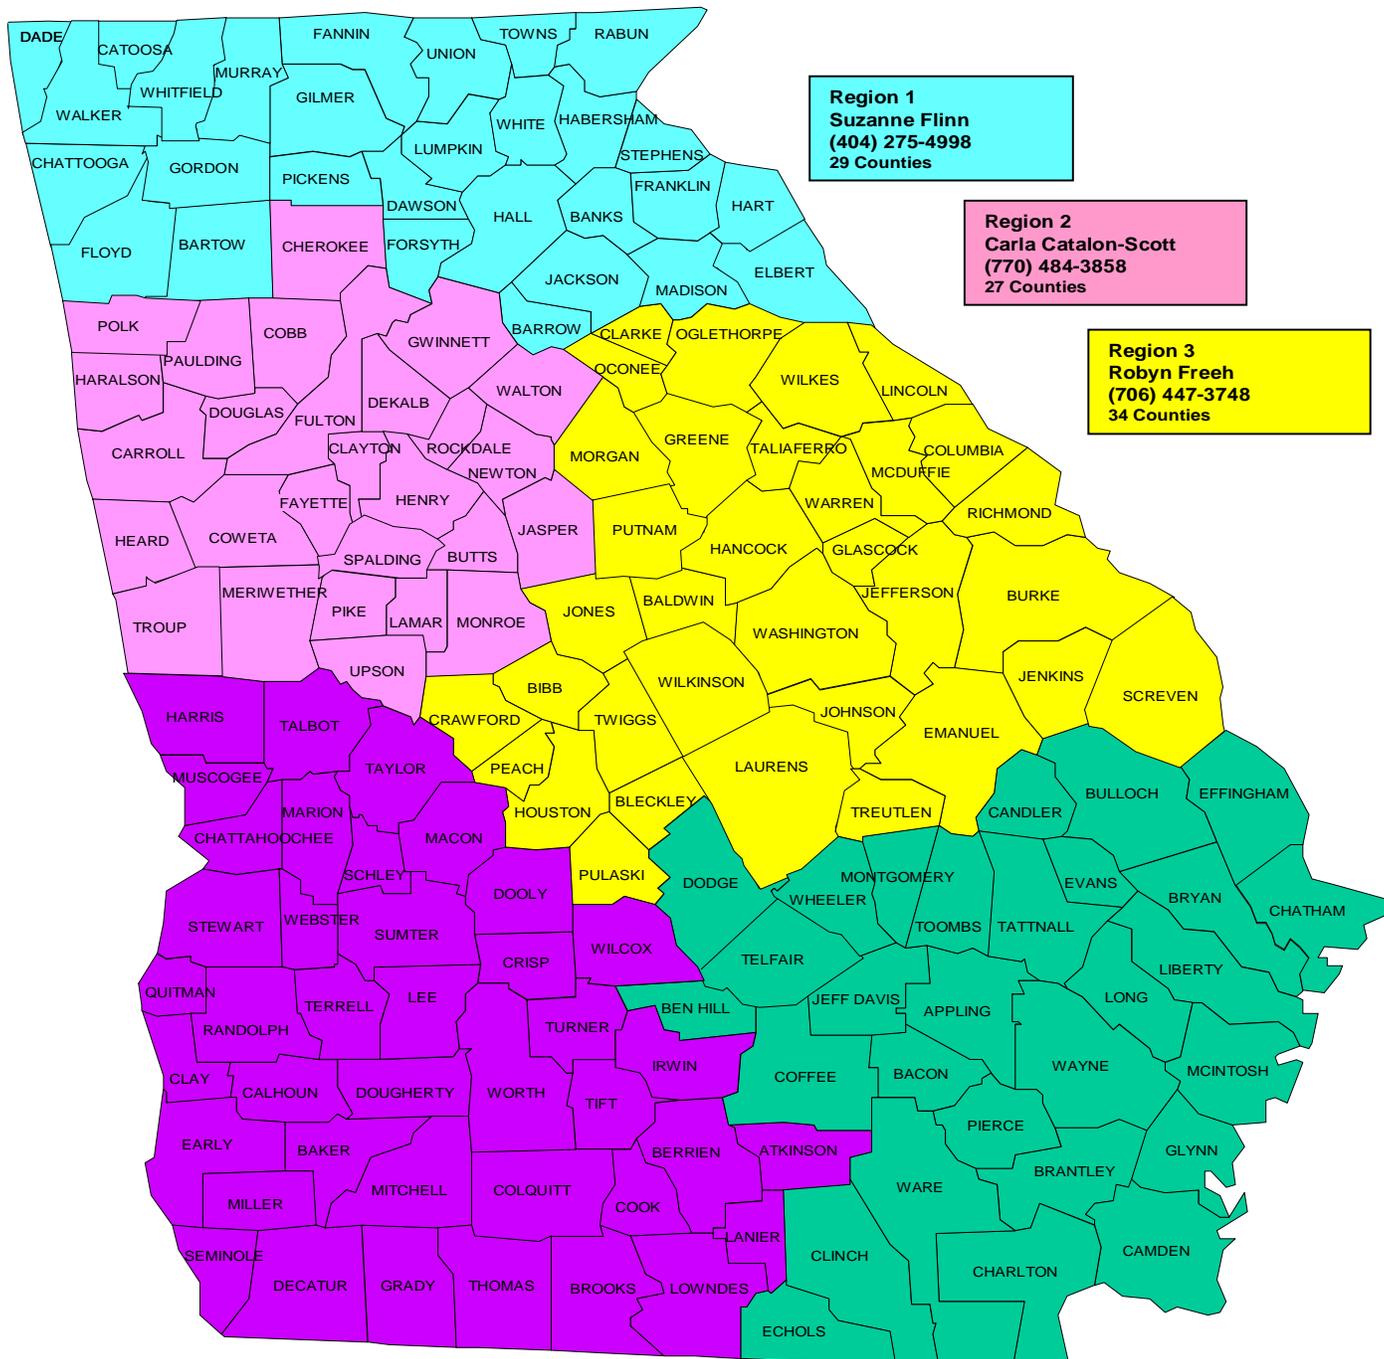

Essential program requirements:

- Licensed health care professionals care for uninsured, low income, patients free of charge
- Volunteers may be GA professional clinical volunteers, active or retired, or those with "Volunteers in Medicine or Dentistry" licenses for providers from other states
- Patients seeking treatment must be 200% below the Federal Poverty Level

Please contact the *Regional Coordinator in your region* or logon to **http://dch.georgia.gov/gvhcp** for more information. The regional map is attached.

Suzanne Flinn	North & Northwest GA	Region 1	404.275.4998
