Validation Overview

The Centers for Medicare & Medicaid Services (CMS) requires that states, through their contracts with managed care organizations (MCOs), measure and report on performance to assess the quality and appropriateness of care and services provided to members. Title 42 of the Code of Federal Regulations (CFR) §438.350(a) requires states that contract with MCOs, prepaid inpatient health plans (PIHPs), prepaid ambulatory health plans (PAHPs), or a primary care case management (PCCM) entity to have a qualified external quality review organization (EQRO) perform an annual external quality review (EQR) that includes validation of contracted entity performance measures (42 CFR §438.358[b][1][ii]). HSAG conducted performance measure validation (PMV) for the Georgia Department of Community Health (DCH), validating the data collection and reporting processes used to calculate the performance measure rates by the MCOs (referred to by the State as care management organizations [CMOs]) in accordance with the CMS publication, *Protocol 2. Validation of Performance Measures: A Mandatory EQR-Related Activity*, October 2019.¹ The purpose of the PMV is to assess the accuracy of performance measures reported by the MCOs and to determine the extent to which performance measures reported by the MCOs follow State specifications and reporting requirements.

The DCH is responsible for administering the Medicaid program and the Children's Health Insurance Program (CHIP) in the State of Georgia. The State refers to its CHIP program as PeachCare for Kids[®]. Both programs include fee-for-service (FFS) and managed care components and deliver services through a statewide provider network. The FFS program has been in place since the inception of Medicaid in Georgia. The DCH contracts with four privately owned CMOs to deliver services to certain categories of members enrolled in the State's Medicaid and PeachCare for Kids[®] programs. Children in state custody, children receiving adoption assistance, and certain children in the juvenile justice system are enrolled in the Georgia Families 360[°] (GF 360[°]) managed care program. The Georgia Families (GF) program, implemented in 2006, serves all other Medicaid and PeachCare for Kids[®] managed care members not enrolled in the GF 360[°] program. Approximately 1.3 million beneficiaries are enrolled in the GF program.²

HSAG validated a set of performance measures identified by DCH that were calculated and reported by the CMOs for their GF population. The DCH identified the measurement period as calendar year (CY) 2019. HSAG conducted the validation in accordance with the CMS publication, *Protocol 2. Validation of Performance Measures: A Mandatory EQR-Related Activity*, October 2019.

Care Management Organization (CMO) Information

Basic information about CareSource appears in Table 1, including the office location(s) involved in the 2020 validation of performance measures audit that covered the CY 2019 measurement period.

Table 1—CareSource Information

| | |
|----------------------------------|---|
| CMO Name: | CareSource |
| CMO Location: | 600 Galleria Parkway, Ste. 400, Atlanta, GA 30339 |
| Review Location: | Virtual Webex |
| Audit Contact: | Andrea J. Hundley |
| Contact Telephone Number: | 678.214.7505 |
| Contact Email Address: | Andrea.Hundley@caresource.com |
| Site Visit Date: | March 24, 2020 |

Performance Measures Validated

HSAG validated rates for the following set of performance measures selected by DCH for validation. All performance measures were selected from CMS’ Core Set of Children’s Health Care Quality Measures for Medicaid and CHIP (Child Core Set),³ Core Set of Health Care Quality Measures for Adults Enrolled in Medicaid (Adult Core Set),⁴ or the Agency for Healthcare Research and Quality’s (AHRQ’s) Quality Indicator measures. The measurement period was identified by DCH as CY 2019 for all measures Table 2 lists the performance measures that HSAG validated, the method required by DCH for data collection, and the specifications the CMO was required to use for each of the measures.

Table 2—List of CY 2019 Performance Measures for CareSource

| | Performance Measure | Acronym | Methodology | Required Measure Specifications | Populations | |
|---|---|---------|-------------|---------------------------------|-------------|------|
| | | | | | GF | P4HB |
| 1 | <i>Contraceptive Care—All Women Ages 15–20</i> | CCW-CH | Admin | Child Core Set | | X |
| 2 | <i>Contraceptive Care—All Women Ages 21–44</i> | CCW-CH | Admin | Child Core Set | | X |
| 3 | <i>Developmental Screening in the First Three Years of Life</i> | DEV-CH | Hybrid | Custom (Child Core Set)* | X | |

³ The Centers for Medicare & Medicaid Services. Core Set of Children’s Health Care Quality Measures for Medicaid and CHIP, June 2016.

⁴ The Centers for Medicare & Medicaid Services. Core Set of Health Care Quality Measures for Adults Enrolled in Medicaid, June 2016.

| | Performance Measure | Acronym | Methodology | Required Measure Specifications | Populations | |
|---|--|---------|-------------|---------------------------------|-------------|------|
| | | | | | GF | P4HB |
| 4 | <i>Diabetes Short-Term Complications Admission Rate</i> | PQI-01 | Admin | Adult Core Set | X | |
| 5 | <i>Heart Failure Admission Rate</i> | PQI-08 | Admin | Adult Core Set | X | |
| 6 | <i>Live Births Weighing Less Than 2,500 Grams</i> (reported as a percentage, not per live births; reported at the county level [159 counties]) | PQI-09 | Admin | Custom (AHRQ)** | X | |
| 7 | <i>Screening for Depression and Follow-Up Plan: Ages 12–17</i> | CDF-CH | Admin | Child Core Set | X | |
| 8 | <i>Screening for Depression and Follow-Up Plan: Ages 18 and Older</i> | CDF-AD | Admin | Adult Core Set | X | |
| 9 | <i>Percentage of Eligibles Who Received Preventive Dental Services</i> | DEV-CH | Admin | Child Core Set | X | |

*CMOs should use the Child Core Set dated February 2019 and apply the following modifications: All claims will have EP modifier 96110. CMOs must exclude claims that also have a UA modifier, as these indicate autism services.

**CMOs should follow the AHRQ specification dated June 2018 except report the rate as a percentage and not per live births; CMOs are required to report this rate for each Georgia Medicaid county.

In addition to the AHRQ and the CMS adult and child core set measures audited by HSAG, DCH required CareSource to report a selected set of Healthcare Effectiveness Data and Information Set (HEDIS®)⁵ measures to DCH. CareSource was required to contract with a National Committee for Quality Assurance (NCQA)-licensed audit organization and undergo an NCQA HEDIS Compliance Audit™.⁶ Final audited HEDIS measure results from NCQA’s Interactive Data Submission System (IDSS) were submitted to HSAG and provided to DCH. Appendix D displays the final audited HEDIS 2020 results for all required measures, covering the CY 2019 measurement period.

Description of Validation Activities

Pre-Audit Strategy

HSAG conducted the validation activities as outlined in the CMS performance measure validation protocol. To complete the validation activities for CareSource, HSAG obtained a list of the performance measures that were selected by DCH for validation.

HSAG then prepared a document request letter that was submitted to CareSource outlining the steps in the performance measure validation process. The document request letter included a request for source

⁵ HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

⁶ NCQA HEDIS Compliance Audit™ is a trademark of the National Committee for Quality Assurance (NCQA).

code for each performance measure; a completed 2020 Information Systems Capabilities Assessment Tool (ISCAT) and any additional supporting documentation necessary to complete the audit. The letter also included an introduction to the medical record review validation (MRRV) process; a timetable for completion; and instructions for submission. HSAG responded to ISCAT-related questions received directly from CareSource during the pre-audit phase.

Approximately one month prior to the virtual site visit, HSAG provided CareSource with an agenda describing all virtual site visit activities and indicating the type of staff needed for each session. HSAG also conducted a pre-audit conference call with CareSource to discuss virtual review logistics and expectations, important deadlines, outstanding Roadmap documentation, and any questions from CareSource regarding the process.

Validation Team

The HSAG Performance Measure Validation Team was composed of a lead auditor and several validation team members. HSAG assembled the team based on the skills required for the validation and requirements of CareSource. Some team members, including the lead auditor, participated in the virtual meetings with CareSource; others conducted their work at HSAG’s offices. Table 3 lists the validation team members, their roles, and their skills and expertise.

Table 3—Validation Team

| Name and Role | Skills and Expertise |
|---|---|
| Allen Iovannisci, MS, CHCA, CPHQ <i>Lead Auditor</i> | Certified HEDIS Compliance Auditor (CHCA); performance measure knowledge, data integration, systems review, and analysis. |
| Romy Franklin, MS <i>Healthcare Quality Manager, Audits/State & Corporate Services</i> | Liaison between audit team and clients; manages deliverables and timelines; coordinates source code review activities. |
| Tammy Gianfrancisco <i>HEDIS Manager, Audits/State & Corporate Services-</i> | Multiple years of healthcare industry experience, with expertise in validation of performance measures, electronic health record (EHR) systems, medical billing, data integration, and integrated medical systems analyses. |
| Sarah Lemley <i>Source Code Reviewer</i> | Code reviewer; multiple years of statistics, analysis, with extensive source code/programming language knowledge. |

Technical Methods of Data Collection and Analysis

The CMS performance measure validation protocol identifies key types of data that should be reviewed as part of the validation process. The following list describes the type of data collected and how HSAG conducted an analysis of these data:

- **2020 ISCAT:** CareSource completed and submitted the required and relevant portions of its -ISCAT for HSAG’s review. HSAG used responses from the ISCAT to complete the pre-audit assessment of information systems.
- **Medical record documentation:** CareSource completed the medical record section within the ISCAT. In addition, CareSource submitted the following documentation for review: medical record hybrid tools and instructions, training materials for medical record review (MRR) staff members, and policies and procedures outlining the processes for monitoring the accuracy of the reviews performed by the review staff members. To ensure the accuracy of the hybrid data being abstracted by the CMO, HSAG requested CareSource participate in the review of a convenience sample for selected hybrid measures.
- **Source code (programming language) for performance measures:** CareSource contracted with a software vendor, Inovalon, to generate and calculate rates for the performance measures under review by HSAG. The source code review was conducted via multiple web-assisted sessions where Inovalon displayed the source code for each measure and explained its rate generation and data integration processes to HSAG’s source code review team.
- **Supporting documentation:** HSAG requested documentation that would provide reviewers with additional information to complete the validation process, including policies and procedures, file layouts, system flow diagrams, system log files, and data collection process descriptions. HSAG reviewed all supporting documentation, identifying issues or areas needing clarification for further follow-up.
- **Rate review:** Upon receiving the calculated rates from CareSource, HSAG conducted a review on the reasonableness and integrity of the rates. The review included trending with prior rates and comparison of rates across all CMOs.

Virtual Review Activities

HSAG conducted a virtual site visit with CareSource on March 24, 2020. HSAG collected information using several methods, including interviews, system demonstrations, review of data output files, primary source verification, observation of data processing, and review of data reports. The virtual site visit activities are described as follows:

- **Opening meeting:** The opening meeting included an introduction of the validation team and key CareSource staff members involved in the performance measure validation activities. The review purpose, the required documentation, basic meeting logistics, and queries to be performed were discussed.
- **Evaluation of system compliance:** The evaluation included a review of the information systems, focusing on the processing of claims and encounter data, provider data, patient data, and inpatient data. Additionally, the review evaluated the processes used to collect and calculate the performance measure rates, including accurate numerator and denominator identification and algorithmic compliance (which evaluated whether rate calculations were performed correctly, all data were combined appropriately, and numerator events were counted accurately).

- Review of ISCAT and supporting documentation:** The review included processes used for collecting, storing, validating, and reporting performance measure rates. This session was designed to be interactive with key CareSource staff members so that HSAG could obtain a complete picture of all the steps taken to generate the performance measure rates. The goal of the session was to obtain a confidence level as to the degree of compliance with written documentation compared to actual processes. HSAG conducted interviews to confirm findings from the documentation review, expand or clarify outstanding issues, and ascertain that written policies and procedures were used and followed in daily practice.
- Overview of data integration and control procedures:** The overview included discussion and observation of source code logic, a review of how all data sources were combined, and a review of how the analytic file was produced for the reporting of selected performance measure rates. HSAG performed primary source verification to further validate the output files, reviewed backup documentation on data integration, and addressed data control and security procedures. HSAG also reviewed preliminary rates during this session, if available.
- Closing conference:** The closing conference included a summation of preliminary findings based on the review of the ISCAT and the virtual site visit, and revisited the documentation requirements for any post-visit activities.

HSAG conducted several interviews with key CareSource staff members who were involved with performance measure reporting.

Table 4 displays a list of key CareSource interviewees:

Table 4—CareSource Interviewees

| Name | Title |
|----------------|--|
| Andrea Hundley | Director, Regulatory—GA Market |
| Howard Martin | Team Lead, Information Technology |
| Nicole Johnson | Director, Performance Management |
| Tiffany Parr | Director of Quality Improvement |
| Brendan Ibe | Manager, Quality and Performance Improvement |
| Akban Shaneef | Director, Encounters |
| Ahanata Pandey | Business Intelligence (BI) Developer |
| Angela Wilson | Senior Business Analyst |
| Brenard Otabil | Business Analyst |
| Brent Lackey | Manager, IT Population Health |
| Candace Owens | Senior Compliance & Delegation |
| Chelsi Hall | Encounters |
| Deb Harmsen | Director, Configuration |
| Erika Lawrence | Regulatory Contract Manager |

| Name | Title |
|--------------------|--|
| Gina Case | Manager, Claims Editing System (CES) Configuration |
| Jeff Severino | Director, Information Technology |
| Jordan Seebach | Claims Manager |
| Karen Beldslschies | Manager, IT Population Health |
| Prasanth Appala | Business Intelligence Developer |
| Rachel Angrignon | Manager, Encounters |
| Theresa Moser | Claims Analyst |
| Thomas Dube | Manager, STAR Ratings |
| Thomas Wall | Director, Application Development |
| Uma Kotanu | Data Analyst |
| Diedra Wells | Manager, Compliance and Delegation |
| Dana Donaldson | Director of Finance |
| Kristen Halsey | Director, Vendor Risk |

Data Integration, Data Control, and Performance Measure Documentation

There are several aspects crucial to the calculation of performance measure rates. These include data integration, data control, and documentation of performance measure rate calculations. Each of the following sections describes the validation processes used and the validation findings. For more detailed information, see Appendix A of this report.

Data Integration

Accurate data integration is essential for calculating valid performance measure rates. The steps used to combine various data sources (including claims/encounter data, eligibility data, and other administrative data) must be carefully controlled and validated. HSAG validated the data integration process used by CareSource, which included a review of file consolidations or extracts, a comparison of source data to warehouse files, data integration documentation, source code, production activity logs, and linking mechanisms. Overall, HSAG determined that the data integration processes in place at CareSource were:

- Acceptable
- Not acceptable

Data Control

CareSource's organizational infrastructure must support all necessary information systems; and its quality assurance practices and backup procedures must be sound to ensure timely and accurate processing of data, and to provide data protection in the event of a disaster. HSAG validated the data control processes CareSource used which included a review of disaster recovery procedures, data backup protocols, and related policies and procedures. Overall, HSAG determined that the data control processes in place at CareSource were:

- Acceptable
- Not acceptable

Performance Measure Documentation

Sufficient, complete documentation is necessary to support validation activities. While interviews and system demonstrations provided supplementary information, the majority of the validation review findings were based on documentation provided by CareSource. HSAG reviewed all related documentation, which included the completed Roadmap, job logs, computer programming code, output files, workflow diagrams, narrative descriptions of performance measure calculations, and other related documentation. Overall, HSAG determined that the documentation of performance measure rate calculations by CareSource was:

- Acceptable
- Not acceptable

Validation Results

HSAG evaluated CareSource's data systems for the processing of each data type used for reporting DCH performance measure rates. General findings are indicated below.

Medical Service Data (Claims and Encounters)

There were no changes to the medical service process or system for CareSource during the measurement period. CareSource continued to use the Facets system to process its medical claims. Each claim was required to meet rigorous edit checks to ensure claims contained complete, accurate information prior to being entered into Facets. Once the claims were loaded into Facets, additional edit checks were made to ensure members are active and claims are valid. CareSource used an internal relational database to store all incoming data. The internal data warehouse contained both internal and external data files used for reporting.

CareSource, a 100 percent FFS plan, did not collect encounters (capitated claims) from any provider. CareSource's Facets system captured unlimited procedure and diagnosis codes and was able to distinguish between primary and secondary codes. CareSource did not accept nonstandard coding or nonstandard claim forms to be entered into Facets. CareSource only allowed three standard formats: professional claims (837P), institutional claims (837I), and dental claims (837D).

CareSource claims passed through its pre-adjudication processes, which included member and provider matching to ensure all claims are appropriately coded with active providers and members. Approximately 85 percent of CareSource's Georgia claims were auto-adjudicated. Pended claim volumes and aging claims were monitored by claim managers daily.

Claims were not entered manually. All paper claims received were sent to CareSource's mailroom, scanned and processed through optical character recognition (OCR) software, and converted via electronic data interchange (EDI). No report was generated to document overrides as most pended claims resulted from error messages that needed to be overridden after review to adjudicate.

CareSource used Optum's CES to edit both professional and facility claims and to verify claims for potential coding, reimbursement, and business rule errors.

HSAG reviewed each system and process associated with claims and encounters and had no concerns. Each system captured appropriate, standard coding schemes as required for reporting. CareSource only used standard claim forms for each service type (i.e., dental, professional, institutional, and pharmacy). CareSource sent medical (professional, institutional inpatient, institutional outpatient), dental, vision, and National Council for Prescription Drug Programs (NCPDP) claims in the weekly encounter file to DXC. CareSource advised that 99 percent of all encounters were accepted by DXC/DCH.

HSAG did not have any concerns with CareSource's claims and encounter data processing.

Enrollment Data

CareSource, like all CMOs, received the State enrollment files daily and monthly and loaded them into Facets. CareSource collected and loaded the enrollment data daily, captured the Medicaid identifier, and created an internal Facets identifier. CareSource used the aid codes received by the State to ensure members were assigned to specific populations, which helped to identify the Georgia Community Care population when reporting on each measure.

HSAG verified the aid codes and populations during the virtual site review and conducted primary source verification of distinct members to ensure the populations were separated.

CareSource's Facets system captured all relevant fields from the State's enrollment files and continued to monitor daily file updates, cancellations, and renewals.

Members with duplicate identifiers were merged into a single record based on the State's most recent identification number. The duplicate member identifier only occurred with newborns and was quickly resolved at CareSource.

CareSource conducted appropriate oversight of the enrollment process through ongoing internal audits and communication with the State enrollment authority. HSAG confirmed there were no changes to CareSource's enrollment data process since the previous year's review.

HSAG and CareSource confirmed that Planning for Healthy Babies® (P4HB®) members were only included in the *Contraceptive Care—All Women Ages 15–20* and *Contraceptive Care—All Women Ages 21–44* measures. No other measures were included in the P4HB® membership. This was further confirmed by HSAG during the virtual site review measure drilldowns.

HSAG had no concerns with CareSource's enrollment and member processes.

Provider Data

HSAG conducted a thorough review of CareSource's provider data capture. CareSource used Facets to capture all provider data. Provider specialties were captured appropriately, and national practitioner identifiers (NPIs) and tax identifiers were captured in Facets in separate fields.

Although the State credentialed all in-state providers and submitted this information to the CMOs, HSAG conducted primary source verification of the provider specialties and federally qualified health center (FQHC) designations.

During primary source verification, HSAG selected a family practitioner and an FQHC to examine. Both entities were mapped to primary care providers in Facets appropriately.

HSAG found CareSource to be compliant with the credentialing and assignment of individual provider specialties in the Facets system and the vendor software system, SS&C Health (formerly DST Health Solutions).

HSAG conducted primary source verification of the provider system during the measures drilldown sessions to identify any issues across providers and hospital systems. HSAG also reviewed a sample of provider specialties to ensure the specialties matched the credentialed providers’ education and board certification. HSAG found CareSource to be compliant with the credentialing and assignment of individual provider specialties and hospital accreditation.

HSAG staff members reviewed and approved CareSource’s provider specialty mapping and determined it to be compliant for performance measure reporting.

HSAG did not have any concerns with CareSource’s provider data processing.

Medical Record Review Validation (MRRV)

Table 5—MRRV Results for CareSource

| Performance Measure | Initial Sample Size | Findings | Follow-up | Final Results |
|---|---------------------|----------|-----------|---------------|
| <i>Developmental Screening in the First Three Years of Life</i> | 16 | Pass | None | R |

Supplemental Data

The measures under the scope of the audit were not impacted by supplemental data. Therefore, no review was required.

Data Integration

CareSource used SS&C Health’s CareAnalyzer to produce the measures under review. SS&C Health provided the software and processed the files on behalf of CareSource. Data extracts included enrollment, provider, and claims files and were submitted to SS&C Health’s CareAnalyzer using its proprietary formats.

Data extracts were loaded into CareAnalyzer raw tables, and data quality reports were reviewed and approved prior to finalizing all data loads. When issues were identified, new data files would be created to correct the issues.

Standard administrative refreshes occurred monthly between January and April with one exception—enrollment data which were frozen in January. All claims files underwent a complete refresh in April 2020.

HSAG conducted primary source verification on the *Screening for Depression and Follow-Up Plan: Ages 18 and Older* and *Live Births Weighing Less Than 2,500 Grams* measures. No issues or concerns were noted during the review. All numerators were appropriately mapped.

One measure, *Screening for Depression and Follow-Up Plan: Ages 18 and Older* required source code review as it was produced external to SS&C Health’s software. SS&C Health also provided code walkthroughs for the measures it produced. All measures were approved by HSAG and were found to be consistent with the specifications.

HSAG had no concerns with the data integration process.

HSAG conducted primary source verification for the *Live Births Weighing Less Than 2,500 Grams*, *Contraceptive Care—All Women Ages 15–20*, and *Contraceptive Care—All Women Ages 21–44* measures. All measures passed primary source verification.

The *Live Births Weighing Less Than 2,500 Grams, Contraceptive Care—All Women Ages 15–20* (PQI-09) measure requires a rate per 1,000 members. The DCH indicated that it did not want to report this measure as a rate per 1,000 but rather as a percentage and broken out by county. HSAG verified that CareSource reported the measure as a percent by county. There were no concerns with CareSource’s reporting of any measure.

Performance Measure Specific Findings

Based on all validation activities, HSAG determined validation results for each performance measure rate. HSAG provided an audit result for each performance measure as defined in Table 6.

Table 6—Audit Results and Definitions for Performance Measures

| | |
|----------------------------|--|
| Reportable (R) | The CMO followed the State’s specifications and produced a reportable rate or result for the measure. |
| Not Reportable (NR) | The calculated rate was materially biased. |
| Not Applicable (NA) | The CMO followed the State’s specifications, but the denominator was too small (<30) to report a valid rate. |

According to the CMS protocol, the audit result for each performance measure rate is determined by the magnitude of the errors detected for the audit elements, not by the number of audit elements determined to be “Not Reportable.” It is possible for a single audit element to receive an audit result of “NR” when the impact of the error associated with that element biased the reported performance measure rate more than 5 percentage points. Conversely, it is also possible that several audit element errors may have little impact on the reported rate, leading to an audit result of “R.”

Table 7 displays the key review findings and final audit results for CareSource for each performance measure rate. For additional information regarding performance measure rates, see Appendix C of this report.

Table 7—Key Review Findings and Audit Results for CareSource

| Performance Measures | | Key Review Findings | Audit Results |
|----------------------|--|---------------------|---------------|
| 1. | <i>Contraceptive Care—All Women Ages 15–20</i> | No concerns | R |
| 2. | <i>Contraceptive Care—All Women Ages 21-44</i> | No concerns | R |
| 3. | <i>Developmental Screening in the First Three Years of Life</i> | Rotated measure | R |
| 4. | <i>Diabetes Short-Term Complications Admission Rate</i> | No concerns | R |
| 5. | <i>Heart Failure Admission Rate</i> | No concerns | R |
| 6. | <i>Live Births Weighing Less Than 2,500 Grams</i> | No concerns | R |
| 7. | <i>Screening for Depression and Follow-Up Plan (Ages 12–17)</i> | No concerns | R |
| 8. | <i>Screening for Depression and Follow-Up Plan (Ages 18 and Older)</i> | No concerns | R |
| 9. | <i>Percentage of Eligibles Who Received Preventive Dental Services (reported at the county level [159 counties])</i> | No concerns | R |

Appendix A. Data Integration and Control Findings

Documentation Worksheet

| | |
|---------------------------------|----------------------------------|
| CMO Name: | CareSource |
| Virtual Site Visit Date: | March 24, 2020 |
| Reviewers: | Allen Iovannisci, MS, CHCA, CPHQ |

Table A-1—Data Integration and Control Findings for CareSource

| Data Integration and Control Element | Met | Not Met | N/A | Comments |
|---|-------------------------------------|--------------------------|--------------------------|-------------|
| Accuracy of data transfers to assigned performance measure data repository. | | | | |
| The CMO accurately and completely processes transfer data from the transaction files (e.g., membership, provider, encounter/claims) into the performance measure data repository used to keep the data until the calculations of the performance measure rates have been completed and validated. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| Samples of data from the performance measure data repository are complete and accurate. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| Accuracy of file consolidations, extracts, and derivations. | | | | |
| The CMO's processes to consolidate diversified files and to extract required information from the performance measure data repository are appropriate. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| Actual results of file consolidations or extracts are consistent with those that should have resulted according to documented algorithms or specifications. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| Procedures for coordinating the activities of multiple subcontractors ensure the accurate, timely, and complete integration of data into the performance measure database. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| Computer program reports or documentation reflect vendor coordination activities, and no data necessary for performance measure reporting are lost or inappropriately modified during transfer. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| If the CMO uses a performance measure data repository, its structure and format facilitates any required programming necessary to calculate and report required performance measure rates. | | | | |
| The performance measure data repository's design, program flow charts, and source codes enable analyses and reports. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |

| Data Integration and Control Element | Met | Not Met | N/A | Comments |
|---|-------------------------------------|--------------------------|--------------------------|-------------|
| Proper linkage mechanisms are employed to join data from all necessary sources (e.g., identifying a member with a given disease/condition). | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| Assurance of effective management of report production and of the reporting software. | | | | |
| Documentation governing the production process, including CMO production activity logs and the CMO staff review of report runs, is adequate. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| Prescribed data cutoff dates are followed. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| The CMO retains copies of files or databases used for performance measure reporting in case results need to be reproduced. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| The reporting software program is properly documented with respect to every aspect of the performance measure data repository, including building, maintaining, managing, testing, and report production. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| The CMO's processes and documentation comply with the CMO standards associated with reporting program specifications, code review, and testing. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |

|--|-------------------------------------|--------------------------|--------------------------|-------------|
| For each of the performance measures, all members of the relevant populations identified in the performance measure specifications are included in the population from which the denominator is produced. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| Adequate programming logic or source code exists to appropriately identify all relevant members of the specified denominator population for each of the performance measures. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| The CMO correctly calculates member months and member years if applicable to the performance measure. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| The CMO properly evaluates the completeness and accuracy of any codes used to identify medical events, such as diagnoses, procedures, or prescriptions, and these codes are appropriately identified and applied as specified in each performance measure. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| If any time parameters are required by the specifications of the performance measure, they are followed (e.g., cutoff dates for data collection, counting 30 calendar days after discharge from a hospital). | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| Exclusion criteria included in the performance measure specifications are followed. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| Systems or methods used by the CMO to estimate populations when they cannot be accurately or completely counted (e.g., newborns) are valid. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |

Table B-2—Numerator Validation Findings for CareSource

| Audit Element | Met | Not Met | N/A | Comments |
|---|-------------------------------------|--------------------------|--------------------------|-------------|
| The CMO uses the appropriate data, including linked data from separate data sets, to identify the entire at-risk population. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| Qualifying medical events (such as diagnoses, procedures, prescriptions, etc.) are properly identified and confirmed for inclusion in terms of time and services. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| The CMO avoids or eliminates all double-counted members or numerator events. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| Any nonstandard codes used in determining the numerator are mapped to a standard coding scheme in a manner that is consistent, complete, and reproducible, as evidenced by a review of the programming logic or a demonstration of the program. | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |
| If any time parameters are required by the specifications of the performance measure, they are followed (i.e., the measured event occurred during the time period specified or defined in the performance measure). | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | No concerns |

Appendix C. Performance Measure Rate Submission File

Appendix C contains CareSource's final audited performance measure rate submission file.
