Validation Overview

The Centers for Medicare & Medicaid Services (CMS) requires that states, through their contracts with managed care organizations (MCOs), measure and report on performance to assess the quality and appropriateness of care and services provided to members. Title 42 of the Code of Federal Regulations (CFR) §438.350(a) requires states that contract with MCOs, prepaid inpatient health plans (PIHPs), prepaid ambulatory health plans (PAHPs), or a primary care case management (PCCM) entity to have a qualified external quality review organization (EQRO) perform an annual external quality review (EQR) that includes validation of contracted entity performance measures (42 CFR §438.358[b][1][ii]). HSAG conducted performance measure validation (PMV) for the Georgia Department of Community Health (DCH), validating the data collection and reporting processes used to calculate the performance measure rates by the MCOs (referred to by the State as care management organizations [CMOs]) in accordance with the CMS publication, *Protocol 2: Validation of Performance Measures: A Mandatory EQR-Related Activity*, October 2019.¹ The purpose of the PMV is to assess the accuracy of performance measures reported by the MCOs and to determine the extent to which performance measures reported by the MCOs follow State specifications and reporting requirements.

The DCH is responsible for administering the Medicaid program and the Children's Health Insurance Program (CHIP) in the State of Georgia. The State refers to its CHIP program as PeachCare for Kids[®]. Both programs include fee-for-service (FFS) and managed care components and deliver services through a statewide provider network. The FFS program has been in place since the inception of Medicaid in Georgia. The DCH contracts with four privately owned CMOs to deliver services to certain categories of members enrolled in the State's Medicaid and PeachCare for Kids[®] programs. Children in state custody, children receiving adoption assistance, and certain children in the juvenile justice system are enrolled in the Georgia Families 360[°] (GF 360[°]) managed care program. The Georgia Families (GF) program, implemented in 2006, serves all other Medicaid and PeachCare for Kids[®] managed care members not enrolled in the GF 360[°] program. Approximately 1.3 million beneficiaries are enrolled in the GF program.²

HSAG validated a set of performance measures identified by DCH that were calculated and reported by the CMOs for their GF population. The DCH identified the measurement period as calendar year (CY) 2020. HSAG conducted the validation in accordance with the CMS publication, *Protocol 2: Validation of Performance Measures: A Mandatory EQR-Related Activity*, October 2019.

¹ Department of Health and Human Services, Centers for Medicare & Medicaid Services. *EQR Protocol 2: Validation of Performance Measures: A Mandatory EQR-Related Activity*, October 2019. Care Management Organization (CMO) Information

Basic information about CareSource (CareSource) appears in Table 1, including the office location(s) involved in the 2021 validation of performance measures audit that covered measurement year (MY) 2020.

Table 1—CareSource Information

CMO Location:	600 Galleria Parkway, Suite 400, Atlanta, GA 30339
Virtual Audit or On-site Visit:	Virtual Audit Review
Audit Contact:	Andrea J. Hundley
Contact Telephone Number:	Director, Regulatory – Georgia Market
Contact Email Address:	Andrea.hundley@caresource.com
Audit Review Date:	April 28, 2021

Performance Measures Validated

HSAG validated rates for a set of performance measures selected by DCH for reporting of the Medicaid GF population. In addition, DCH required the CMOs to report separate rates for its PeachCare for Kids[®] population for a selected set of measures as indicated in the table below. All performance measures were selected from CMS’ Core Set of Children’s Health Care Quality Measures for Medicaid and CHIP (Child Core Set),³ Core Set of Adult Health Care Quality Measures for Medicaid (Adult Core Set),⁴ or the Agency for Healthcare Research and Quality’s (AHRQ’s) Quality Indicator measures. The measurement period was identified by DCH as CY 2020 for all measures. Table 2 lists the performance measures that HSAG validated, the methodology (i.e., Administrative [Admin] or Hybrid) required by DCH for data collection, the specifications required for each measure, and the populations required for reporting.

Table 2—List of MY 2020 Performance Measures for CareSource

Performance Measure	Acronym	Methodology	Measure Specifications	Populations	
				Georgia Families	PeachCare for Kids [®]
1 <i>Developmental Screening in the First Three Years of Life</i>	DEV-CH	Hybrid	Custom (Child Core Set)*	✓	✓

³ The Centers for Medicare & Medicaid Services. Core Set of Children’s Health Care Quality Measures for Medicaid and CHIP, March 2020.

⁴ The Centers for Medicare & Medicaid Services. Core Set of Adult Health Care Quality Measures for Medicaid, March 2020.

Performance Measure	Acronym	Methodology	Measure Specifications	Populations	
				Georgia Families	PeachCare for Kids®
2 <i>Diabetes Short-Term Complications Admission Rate</i>	PQI-01	Admin	Adult Core Set	✓	
3 <i>Heart Failure Admission Rate</i>	PQI-08	Admin	Adult Core Set	✓	
4 <i>Live Births Weighing Less Than 2,500 Grams</i>	PQI-09	Admin	Custom (AHRQ)**	✓	✓
5 <i>Percentage of Eligibles Who Received Dental Services</i>	PDENT-CH	Admin	Child Core Set	✓	
6 <i>Screening for Depression and Follow-Up Plan: Ages 12–17</i>	CDF-CH	Admin	Child Core Set	✓	
7 <i>Screening for Depression and Follow-Up Plan: Ages 18 and Older</i>	CDF-AD	Admin	Adult Core Set	✓	✓

*The CMOs followed the Child Core Set dated March 2020 and applied the following modifications: All claims must have EP modifier 96110; claims that also have a UA modifier must be excluded as these indicate autism services.

**CMOs followed the AHRQ specification dated June 2018 except reported the rate as a percentage and not per live births; the CMOs were required to report this rate for each Georgia Medicaid county.

In addition to the AHRQ and the CMS Adult and Child Core Set measures audited by HSAG, DCH required CareSource to report a selected set of Healthcare Effectiveness Data and Information Set (HEDIS®)⁵ measures to DCH. CareSource was required to contract with a National Committee for Quality Assurance (NCQA)-licensed audit organization and undergo an NCQA HEDIS Compliance Audit™.⁶ Final audited HEDIS measure results from NCQA’s Interactive Data Submission System (IDSS) were submitted to HSAG and provided to DCH. Appendix D displays the final audited HEDIS MY 2020 results for all required measures.

Description of Validation Activities

Pre-Audit Strategy

HSAG conducted the validation activities as outlined in the CMS performance measure validation protocol. To complete the validation activities for CareSource, HSAG obtained a list of the performance measures that were selected by DCH for validation.

⁵ HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

⁶ NCQA HEDIS Compliance Audit™ is a trademark of the National Committee for Quality Assurance (NCQA).

HSAG then prepared a document request letter that was submitted to CareSource outlining the steps in the performance measure validation process. The document request letter included a request for source code for each performance measure, a completed MY 2020 Information Systems Capabilities Assessment Tool (ISCAT), and any additional supporting documentation necessary to complete the audit. The letter also included an introduction to the medical record review validation (MRRV) process; a timetable for completion; and instructions for submission. HSAG responded to ISCAT-related questions received directly from CareSource during the pre-audit phase.

Approximately one month prior to the virtual audit review, HSAG provided CareSource with an agenda describing all virtual audit review activities and indicating the type of staff needed for each session. HSAG also conducted a pre-audit review conference call with CareSource to discuss review logistics and expectations, important deadlines, outstanding ISCAT documentation, and any questions from CareSource regarding the process.

Validation Team

The HSAG Performance Measure Validation Team was composed of a lead auditor and several validation team members. HSAG assembled the team based on the skills required for the validation and requirements of CareSource. Some team members, including the lead auditor, participated in the virtual meetings with CareSource; others conducted their work at HSAG’s offices. Table 3 lists the validation team members, their roles, and their skills and expertise.

Table 3—Validation Team

Validation Team Member	Role/Skills/Expertise
Tammy Gianfrancesco, CHCA <i>Lead Auditor</i>	Lead auditor, Certified HEDIS Compliance Auditor (CHCA), and HEDIS and performance measure knowledge.
Advanced Analytics	Analytic Team—Provides analytic support, including source code review.

Technical Methods of Data Collection and Analysis

The CMS performance measure validation protocol identifies key types of data that should be reviewed as part of the validation process. The following list describes the type of data collected and how HSAG conducted an analysis of these data:

- **MY 2020 ISCAT:** CareSource completed and submitted the required and relevant portions of its - ISCAT for HSAG’s review. HSAG used responses from the ISCAT to complete the pre-audit assessment of information systems.
- **Medical record documentation:** CareSource completed the medical record section within the ISCAT. In addition, CareSource submitted the following documentation for review: medical record hybrid tools and instructions, training materials for medical record review (MRR) staff members, and

policies and procedures outlining the processes for monitoring the accuracy of the reviews performed by the review staff members.

- **Source code (programming language) for performance measures:** CareSource was required to submit the source code used to calculate the performance measures under review by HSAG. HSAG reviewed the source code and performance measure generation process to ensure compliance with the measure specifications required by DCH.
- **Supporting documentation:** HSAG requested documentation that would provide reviewers with additional information to complete the validation process, including policies and procedures, file layouts, system flow diagrams, system log files, and data collection process descriptions. HSAG reviewed all supporting documentation, identifying issues or areas needing clarification for further follow-up.
- **Rate review:** Upon receiving the calculated rates from CareSource, HSAG conducted a review on the reasonableness and integrity of the rates. The review included trending with prior year's rates and comparison of rates across all CMOs.

Virtual Review Activities

HSAG conducted a virtual audit review with CareSource on April 28, 2021. HSAG collected information using several methods, including interviews, system demonstrations, review of data output files, primary source verification, observation of data processing, and review of data reports. The virtual site visit activities are described as follows:

- **Opening meeting:** The opening meeting included an introduction of the validation team and key CareSource staff members involved in the performance measure validation activities. The review purpose, the required documentation, basic meeting logistics, and queries to be performed were discussed.
- **Evaluation of system compliance:** The evaluation included a review of the information systems, focusing on the processing of claims and encounter data, provider data, patient data, and inpatient data. Additionally, the review evaluated the processes used to collect and calculate the performance measure rates, including accurate numerator and denominator identification and algorithmic compliance (which evaluated whether rate calculations were performed correctly, all data were combined appropriately, and numerator events were counted accurately).
- **Review of ISCAT and supporting documentation:** The review included processes used for collecting, storing, validating, and reporting performance measure rates. This session was designed to be interactive with key CareSource staff members so that HSAG could obtain a complete picture of all the steps taken to generate the performance measure rates. The goal of the session was to obtain a confidence level as to the degree of compliance with written documentation compared to actual processes. HSAG conducted interviews to confirm findings from the documentation review, expand or clarify outstanding issues, and ascertain that written policies and procedures were used and followed in daily practice.
- **Overview of data integration and control procedures:** The overview included discussion and observation of source code logic, a review of how all data sources were combined, and a review of

how the analytic file was produced for the reporting of selected performance measure rates. HSAG performed primary source verification to further validate the output files, reviewed backup documentation on data integration, and addressed data control and security procedures. HSAG also reviewed preliminary rates during this session, if available.

- **Closing conference:** The closing conference included a summation of preliminary findings based on the review of the ISCAT and the virtual audit review, and revisited the documentation requirements for any post-audit review activities.

HSAG conducted several interviews with key CareSource staff members who were involved with performance measure reporting.

Table 4 displays a list of key CareSource interviewees:

Table 4—List of CareSource Interviewees

Name	Title
Andrea Hundley	Director, Regulatory – Georgia Market
Akbar Shareef	Director, Claims Encounter Data
Angela Cotere	Health Plan Data Analyst III, Provider Information Management

Sami Hadaya	Application Developer III, Population Health Solutions
Sandeep Patel	Manager, Application Development, IT Payer Systems
Santhosh Kethiri	Team Lead, IT
Seema Csukas	Vice President, Market Chief Medical Officer
Sivasankar Kasilingam	Manager, Claims Encounter Data
Tiffany Parr	Assistant Vice President, Market Quality
Tracy Leslie	Compliance Analyst III
Tracy Mora	Manager, Enterprise HEDIS Analytics
Valerie Dubuc	Manager, Vendor Oversight, Vendor Risk and Oversight

Data Integration, Data Control, and Performance Measure Documentation

There are several aspects crucial to the calculation of performance measure rates. These include data integration, data control, and documentation of performance measure rate calculations. Each of the following sections describes the validation processes used and the validation findings. For more detailed information, see Appendix A of this report.

Data Integration

Accurate data integration is essential for calculating valid performance measure rates. The steps used to combine various data sources (including claims/encounter data, eligibility data, and other administrative data) must be carefully controlled and validated. HSAG validated the data integration process used by CareSource, which included a review of file consolidations or extracts, a comparison of source data to warehouse files, data integration documentation, source code, production activity logs, and linking mechanisms. Overall, HSAG determined that the data integration processes in place at CareSource were:

- Acceptable
- Not acceptable

Data Control

CareSource's organizational infrastructure must support all necessary information systems; and its quality assurance practices and backup procedures must be sound to ensure timely and accurate processing of data, and to provide data protection in the event of a disaster. HSAG validated the data control processes CareSource used which included a review of disaster recovery procedures, data backup protocols, and related policies and procedures. Overall, HSAG determined that the data control processes in place at CareSource were:

- Acceptable
- Not acceptable

Performance Measure Documentation

Sufficient, complete documentation is necessary to support validation activities. While interviews and system demonstrations provided supplementary information, the majority of the validation review findings were based on documentation provided by CareSource. HSAG reviewed all related documentation, which included the completed ISCAT, job logs, computer programming code, output files, workflow diagrams, narrative descriptions of performance measure calculations, and other related documentation. Overall, HSAG determined that the documentation of performance measure rate calculations by CareSource was:

- Acceptable
- Not acceptable

Validation Results

HSAG evaluated CareSource's data systems for the processing of each data type used for reporting DCH performance measure rates. General findings are indicated below.

Medical Service Data (Claims and Encounters)

There were no concerns with CareSource's claims and encounter system or processes. CareSource continued to use the TriZetto Facets system for claims processing during MY 2020. New for MY 2020, CareSource used the Edifecs Encounter Management system to create the Georgia-specific Medicaid encounter data files.

Claims submissions are received from clearinghouses. Overall, the majority of claims received in 2020 were submitted electronically via electronic data interchange (EDI) files to CareSource's Web portal or via mail; only approximately 3 percent of claims were submitted by paper. Claims were not entered manually. All paper claims received were sent to CareSource's mailroom, scanned, and processed through optical character recognition (OCR) software, and converted to an EDI format. EDI claims were submitted to and processed by contracted clearinghouses prior to intake and loading into Facets. Regardless of submission method, all claims were processed via Edifecs and underwent a series of validations—i.e., HIPAA compliance, claim level validation, and business logic validation. Once submitted claims were validated for compliance against the national standards, each passed claim was loaded to Facets for adjudication. The pre-processing edits ensured the claims contained valid codes, member, and provider information. Market-specific business rules were applied to claims, as applicable. All claims were tracked from the point of receipt until they were loaded into Facets; with CareSource conducting daily, weekly, and monthly audits to ensure claims were processed accurately.

During the virtual audit review, CareSource provided a demonstration of the Facets system and HSAG reviewed the CMO's claims and encounter data processes. All of CareSource's providers continued to be reimbursed based on a fee-for-service (FFS) model. CareSource's Facets system captured unlimited procedure and diagnosis codes and was able to appropriately identify primary and secondary codes. CareSource only accepted standard diagnosis codes for entry into Facets and only standard forms were accepted; professional claims (837P), institutional claims (837I), and dental claims (837D). Each claim was required to meet rigorous edit checks to ensure claims contained complete, accurate information prior to being entered into Facets. Once the claims were loaded into Facets, additional edit checks were in place to ensure members were active and claims were valid. CareSource used an internal relational database to store all incoming data. The internal data warehouse contained both internal and external data files used for reporting. HSAG determined that the data elements necessary for performance measure reporting were captured within the system.

CareSource used Optum's Claims Editing System (CES) to edit both professional and facility claims and to verify claims for potential coding, reimbursement, and business rule errors. Potential errors were identified by an edit or flag, which reports back to the Facets system.

CareSource had sufficient monitoring and oversight processes in place to ensure the accuracy and quality of claims and encounter data and had multiple edit checks throughout each point of data transfer in Facets and Edifecs. HSAG reviewed each system and process associated with claims and encounters and had no concerns. Each system captured appropriate, standard coding schemes as required for reporting.

Based on its review of ISCAT responses, audit interviews, and a virtual demonstration, HSAG confirmed that CareSource's core information systems captured appropriate, standard coding schemes as required for reporting.

Enrollment Data

HSAG had no concerns with CareSource's membership and enrollment data systems or processes. CareSource continued to use Facets for enrollment data processing. There were no significant changes to CareSource's enrollment data system or processes during the measurement year. CareSource experienced an increase of approximately 20 percent in its GF Medicaid population during the measurement year due to a relaxation of eligibility requirements in response to the coronavirus (COVID-19) pandemic. The increase in membership was consistent with CareSource's expectations.

The daily 834 enrollment files were received electronically from the State's enrollment broker, Gainwell Technologies (Gainwell) in addition to a full monthly reconciliation and end-of-month file. The daily file included member additions, deletions, and modifications. The enrollment data were collected and loaded into Facets on a daily basis. In addition to the unique Medicaid identification (ID) assigned by Gainwell and included in the daily/monthly 834 eligibility files, CareSource also assigned a unique member ID number to new members upon processing in Facets. CareSource used the aid codes received by the State to ensure members were appropriately assigned to specific populations, which helped ensure accurate reporting for the GF and PeachCare for Kids[®] populations required by the State.

CareSource had appropriate oversight of the enrollment process through ongoing internal audits and communication with the State enrollment authority. CareSource's Facets system captured all relevant fields from the State's enrollment files and continued to monitor the quality and completeness of data.

Provider Data

There were no concerns with CareSource's provider data processes. There were no significant changes to CareSource's processes from the prior year. The CMO continued to use Facets to capture provider data for claims processing. The State has a Credentials Verification Organization (CVO) that is responsible for provider credentialing for all Georgia CMOs. CareSource received daily 7400 master provider files from the State. CareSource performs appropriate reconciliation between the daily provider files received from the State and Facets.

HSAG reviewed the provider data elements in Facets during the virtual audit review and verified the system captured key provider characteristics, including specialty. HSAG found CareSource to be

compliant with the assignment of individual provider specialties in the Facets system and the vendor software system, SS&C Health.

Medical Record Review Validation (MRRV)

HSAG had no concerns with CareSource’s medical record review policies and procedures. CareSource had well-established medical record review processes and qualified internal staff performing medical record abstraction using Health Data Vision, Inc.’s (HDVI’s) Reveleer medical record abstraction tool. HSAG participated in a live demonstration of HDVI’s Reveleer hybrid abstraction tool for the *Developmental Screening in the First Three Years of Life* measure. All fields, edits, and drop-down boxes were reviewed for accuracy and were determined to be compliant with the performance measure specifications. Since CareSource passed the MRRV process the prior year and it’s MRR process did not change since the prior year, CareSource was not required to undergo convenience sample validation.

HSAG confirmed that CareSource sampled according to CMS Core Set sampling guidelines. CareSource chase logic was reviewed and determined to be appropriate for the hybrid measure under review. MRR policies and procedures indicated that clinical quality staff and MRR abstractors underwent sufficient training and abstractions were regularly overread by experienced nurses.

CareSource completed MRR and submitted final counts on May 7, 2021. CareSource passed the final MRRV for the *Developmental Screening in the First Three Years of Life* measure; individual results are presented in Table 5.

Table 5—MRRV Results for CareSource

Performance Measure	Sample Size	Status	Final Results
<i>Developmental Screening in the First Three Years of Life—Georgia Families Medicaid</i>	12	Pass	No critical errors confirmed.
<i>Developmental Screening in the First Three Years of Life—PeachCare for Kids®</i>	4	Pass	One critical error was confirmed. The CMO removed this case from its counts and all remaining records passed the MRRV process.

Supplemental Data

CareSource did not use any supplemental data sources that impacted the measures under the scope of the audit; however, processes to incorporate vendor data were identified and reported in the Medical Service Data section.

Data Integration

There were no concerns with CareSource’s data pre-production, data integration, and reporting processes. CareSource continued to use SS&C Health’s CareAnalyzer software to produce the performance measures under the scope of the audit. CareSource describes its processes thoroughly and confirmed that there were no significant changes to its systems and protocols since the prior year.

SS&C Health provided the software and processed the files on behalf of CareSource. Data extracts included enrollment, provider, and claims files and were submitted to SS&C Health’s CareAnalyzer using its proprietary formats. Data extracts were loaded into CareAnalyzer raw tables, and data quality reports were reviewed and approved prior to finalizing all data loads. When issues were identified, new data files would be created to correct the issues.

HSAG conducted primary source verification on the *Screening for Depression and Follow-Up Plan* and *Developmental Screening in the First Three Years of Life* measures during the virtual audit review. No issues or concerns were noted during the review. HSAG reviewed members’ source data to confirm the eligibility, provider specialty, and services performed for each selected measure. All selected cases were found to be compliant with the measure specifications.

CareSource submitted final rates in June which were benchmarked, trended, and reviewed. All measure rates were designated reportable.

Performance Measure Specific Findings

Based on all validation activities, HSAG determined validation results for each performance measure rate. HSAG provided an audit result for each performance measure as defined in Table 6.

Table 6—Audit Results and Definitions for Performance Measures

Reportable (R)	Measure data were compliant with the specifications required by the state.
Do Not Report (DNR)	Measure data were materially biased.

According to the CMS protocol, the audit result for each performance measure rate is determined by the magnitude of the errors detected for the audit elements, not by the number of audit elements determined to be noncompliant based on the review findings. Consequently, an error for a single audit element may result in a designation of “DNR” because the impact of the error associated with that element biased the reported performance measure rate by more than 5 percentage points. Conversely, it is also possible that several audit element errors may have little impact on the reported rate, leading to an audit result of “R.”

Table 7 displays the key review findings and final audit results for CareSource for each performance measure rate. For additional information regarding performance measure rates, see Appendix C of this report.

Table 7—Key Review Findings and Audit Results for CareSource

	Performance Measures	Population	Key Review Findings	Audit Results
1	<i>Developmental Screening in the First Three Years of Life</i>	GF	No concerns.	R
2	<i>Developmental Screening in the First Three Years of Life</i>	PeachCare for Kids®	No concerns.	R
3	<i>Diabetes Short-Term Complications Admission Rate</i>	GF	No concerns.	R
4	<i>Heart Failure Admission Rate</i>	GF	No concerns.	R
5	<i>Live Births Weighing Less Than 2,500 Grams</i>	GF	No concerns.	R
6	<i>Live Births Weighing Less Than 2,500 Grams</i>	PeachCare for Kids®	No concerns.	R
7	<i>Percentage of Eligibles Who Received Dental Services</i>	GF	No concerns.	R
8	<i>Screening for Depression and Follow-Up Plan</i>	GF	No concerns.	R
9	<i>Screening for Depression and Follow-Up Plan</i>	PeachCare for Kids®	No concerns.	R

CMO Name:	CareSource
Virtual Audit Review Date:	April 28, 2021
Reviewer(s):	Tammy Gianfrancisco, CHCA

Table A-1—Data Integration and Control Findings for CareSource

Data Integration and Control Element	Met	Not Met	N/A	Comments
Accuracy of data transfers to assigned performance measure data repository.				
The CMO accurately and completely processes transfer data from the transaction files (e.g., membership, provider, encounter/claims) into the performance measure data repository used to keep the data until the calculations of the performance measure rates have been completed and validated.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
Samples of data from the performance measure data repository are complete and accurate.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
Accuracy of file consolidations, extracts, and derivations.				
The CMO's processes to consolidate diversified files and to extract required information from the performance measure data repository are appropriate.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
Actual results of file consolidations or extracts are consistent with those that should have resulted according to documented algorithms or specifications.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
Procedures for coordinating the activities of multiple subcontractors ensure the accurate, timely, and complete integration of data into the performance measure database.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
Computer program reports or documentation reflect vendor coordination activities, and no data necessary for performance measure reporting are lost or inappropriately modified during transfer.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
If the CMO uses a performance measure data repository, its structure and format facilitates any required programming necessary to calculate and report required performance measure rates.				
The performance measure data repository's design, program flow charts, and source codes enable analyses and reports.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.

Data Integration and Control Element	Met	Not Met	N/A	Comments
Proper linkage mechanisms are employed to join data from all necessary sources (e.g., identifying a member with a given disease/condition).	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
Assurance of effective management of report production and of the reporting software.				
Documentation governing the production process, including CMO production activity logs and the CMO staff review of report runs, is adequate.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
Prescribed data cutoff dates are followed.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
The CMO retains copies of files or databases used for performance measure reporting in case results need to be reproduced.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
The reporting software program is properly documented with respect to every aspect of the performance measure data repository, including building, maintaining, managing, testing, and report production.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
The CMO's processes and documentation comply with the CMO standards associated with reporting program specifications, code review, and testing.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.

Table B-1—Denominator Validation Findings for CareSource

Audit Element	Met	Not Met	N/A	Comments
For each of the performance measures, all members of the relevant populations identified in the performance measure specifications are included in the population from which the denominator is produced.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
Adequate programming logic or source code exists to appropriately identify all relevant members of the specified denominator population for each of the performance measures.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
The CMO correctly calculates member months and member years if applicable to the performance measure.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
The CMO properly evaluates the completeness and accuracy of any codes used to identify medical events, such as diagnoses, procedures, or prescriptions, and these codes are appropriately identified and applied as specified in each performance measure.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
If any time parameters are required by the specifications of the performance measure, they are followed (e.g., cutoff dates for data collection, counting 30 calendar days after discharge from a hospital).	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
Exclusion criteria included in the performance measure specifications are followed.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
Systems or methods used by the CMO to estimate populations when they cannot be accurately or completely counted (e.g., newborns) are valid.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.

Table B-2—Numerator Validation Findings for CareSource

Audit Element	Met	Not Met	N/A	Comments
The CMO uses the appropriate data, including linked data from separate data sets, to identify the entire at-risk population.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
Qualifying medical events (such as diagnoses, procedures, prescriptions, etc.) are properly identified and confirmed for inclusion in terms of time and services.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
The CMO avoids or eliminates all double-counted members or numerator events.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
Any nonstandard codes used in determining the numerator are mapped to a standard coding scheme in a manner that is consistent, complete, and reproducible, as evidenced by a review of the programming logic or a demonstration of the program.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
If any time parameters are required by the specifications of the performance measure, they are followed (i.e., the measured event occurred during the time period specified or defined in the performance measure).	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.

Appendix C. Performance Measure Rate Submission File

Appendix C contains CareSource's final audited performance measure rate submission file.

Audit Review Table—To Be Completed by Auditor					
	Performance Measure	Acronym	Population	Audit Designation	Comments
1	Developmental Screening in the First Three Years of Life	DEV	GF	Reportable (R)	Data collection, integration, and reporting processes are sufficient to produce valid rates.
2	Developmental Screening in the First Three Years of Life	DEV	PCK	Reportable (R)	Data collection, integration, and reporting processes are sufficient to produce valid rates.
3	Diabetes Short-Term Complications Admission Rate	PQI 01	GF	Reportable (R)	Data collection, integration, and reporting processes are sufficient to produce valid rates.
4	Heart Failure Admission Rate	PQI 08	GF	Reportable (R)	Data collection, integration, and reporting processes are sufficient to produce valid rates.
5	Live Births Weighing Less Than 2,500 Grams	PQI 09	GF	Reportable (R)	Data collection, integration, and reporting processes are sufficient to produce valid rates. Note: Reported as a percentage, instead of per live births. Reported at the county level (159 counties total).
6	Live Births Weighing Less Than 2,500 Grams	PQI 09	PCK	Not Applicable (NA)	Data collection, integration, and reporting processes are sufficient; however, the denominator was too small (<30) to report a valid rate. Note: Reported as a percentage, instead of per live births. Reported at the county level (159 counties total).
7	Percentage of Eligibles Who Received Preventive Dental Services	PDENT	GF	Reportable (R)	Data collection, integration, and reporting processes are sufficient to produce valid rates.
8	Screening for Depression and Follow-Up Plan	CDF	GF	Reportable (R)	Data collection, integration, and reporting processes are sufficient to produce valid rates.
9	Screening for Depression and Follow-Up Plan	CDF	PCK	Reportable (R)	Data collection, integration, and reporting processes are sufficient to produce valid rates.
