Validation Overview

The Centers for Medicare & Medicaid Services (CMS) requires that states, through their contracts with managed care organizations (MCOs), measure and report on performance to assess the quality and appropriateness of care and services provided to members. Title 42 of the Code of Federal Regulations (CFR) §438.350(a) requires states that contract with MCOs, prepaid inpatient health plans (PIHPs), prepaid ambulatory health plans (PAHPs), or a primary care case management (PCCM) entity to have a qualified external quality review organization (EQRO) perform an annual external quality review (EQR) that includes validation of contracted entity performance measures (42 CFR §438.358[b][1][ii]). HSAG conducted performance measure validation (PMV) for the Georgia Department of Community Health (DCH), validating the data collection and reporting processes used to calculate the performance measure rates by the MCOs (referred to by the State as care management organizations [CMOs]) in accordance with the CMS publication, *Protocol 2: Validation of Performance Measures: A Mandatory EQR-Related Activity*, October 2019.¹ The purpose of the PMV is to assess the accuracy of performance measures reported by the MCOs and to determine the extent to which performance measures reported by the MCOs follow State specifications and reporting requirements.

The DCH is responsible for administering the Medicaid program and the Children's Health Insurance Program (CHIP) in the State of Georgia. The State refers to its CHIP program as PeachCare for Kids[®]. Both programs include fee-for-service (FFS) and managed care components and deliver services through a statewide provider network. The FFS program has been in place since the inception of Medicaid in Georgia. The DCH contracts with four privately owned CMOs to deliver services to certain categories of members enrolled in the State's Medicaid and PeachCare for Kids[®] programs. Children in state custody, children receiving adoption assistance, and certain children in the juvenile justice system are enrolled in the Georgia Families 360[°] (GF 360[°]) managed care program. The Georgia Families (GF) program, implemented in 2006, serves all other Medicaid and PeachCare for Kids[®] managed care members not enrolled in the GF 360[°] program. Approximately 1.3 million beneficiaries are enrolled in the GF program.²

HSAG validated a set of performance measures identified by DCH that were calculated and reported by the CMOs for their GF population. The DCH identified the measurement period as calendar year (CY) 2020. HSAG conducted the validation in accordance with the CMS publication, *Protocol 2: Validation of Performance Measures: A Mandatory EQR-Related Activity*, October 2019.

Care Management Organization (CMO) Information

Basic information about Peach State Health Plan (Peach State) appears in Table 1, including the office location(s) involved in the 2021 validation of performance measures audit that covered measurement year (MY) 2020.

Table 1—Peach State Health Plan Information

CMO Location:	1100 Circle 75 Parkway, Suite 1100, Atlanta, GA 30339
Virtual Audit or On-site Visit:	Virtual Audit Review
Audit Contact:	Tawonna Ingram, RHIA, CPC
Contact Telephone Number:	(770) 628-9603
Contact Email Address:	Tawonna.r.ingram@centene.com
Audit Review Date:	March 31, 2021

Performance Measures Validated

HSAG validated rates for a set of performance measures selected by DCH for reporting of the Medicaid GF population. In addition, DCH required the CMOs to report separate rates for its PeachCare for Kids[®] population for a selected set of measures as indicated in the table below. All performance measures were selected from CMS’ Core Set of Children’s Health Care Quality Measures for Medicaid and CHIP (Child Core Set),³ Core Set of Adult Health Care Quality Measures for Medicaid (Adult Core Set),⁴ or the Agency for Healthcare Research and Quality’s (AHRQ’s) Quality Indicator measures. The measurement period was identified by DCH as CY 2020 for all measures. Table 2 lists the performance measures that HSAG validated, the methodology (i.e., Administrative [Admin] or Hybrid) required by DCH for data collection, the specifications required for each measure, and the populations required for reporting.

Table 2—List of MY 2020 Performance Measures for Peach State Health Plan

Performance Measure	Acronym	Methodology	Measure Specifications	Populations	
				Georgia Families	PeachCare for Kids [®]
1 <i>Developmental Screening in the First Three Years of Life</i>	DEV-CH	Hybrid	Custom (Child Core Set)*	✓	✓

³ The Centers for Medicare & Medicaid Services. Core Set of Children’s Health Care Quality Measures for Medicaid and CHIP, March 2020.

⁴ The Centers for Medicare & Medicaid Services. Core Set of Adult Health Care Quality Measures for Medicaid, March 2020.

Performance Measure	Acronym	Methodology	Measure Specifications	Populations	
				Georgia Families	PeachCare for Kids®
2 <i>Diabetes Short-Term Complications Admission Rate</i>	PQI-01	Admin	Adult Core Set	✓	
3 <i>Heart Failure Admission Rate</i>	PQI-08	Admin	Adult Core Set	✓	
4 <i>Live Births Weighing Less Than 2,500 Grams</i>	PQI-09	Admin	Custom (AHRQ)**	✓	✓
5 <i>Percentage of Eligibles Who Received Dental Services</i>	PDENT-CH	Admin	Child Core Set	✓	
6 <i>Screening for Depression and Follow-Up Plan: Ages 12–17</i>	CDF-CH	Admin	Child Core Set	✓	
7 <i>Screening for Depression and Follow-Up Plan: Ages 18 and Older</i>	CDF-AD	Admin	Adult Core Set	✓	✓

*The CMOs followed the Child Core Set dated March 2020 and applied the following modifications: All claims must have EP modifier 96110; claims that also have a UA modifier must be excluded as these indicate autism services.

**CMOs followed the AHRQ specification dated June 2018 except reported the rate as a percentage and not per live births; the CMOs were required to report this rate for each Georgia Medicaid county.

In addition to the AHRQ and the CMS Adult and Child Core Set measures audited by HSAG, DCH required Peach State to report a selected set of Healthcare Effectiveness Data and Information Set (HEDIS®)⁵ measures to DCH. Peach State was required to contract with a National Committee for Quality Assurance (NCQA)-licensed audit organization and undergo an NCQA HEDIS Compliance Audit™.⁶ Final audited HEDIS measure results from NCQA’s Interactive Data Submission System (IDSS) were submitted to HSAG and provided to DCH. Appendix D displays the final audited HEDIS MY 2020 results for all required measures.

Description of Validation Activities

Pre-Audit Strategy

HSAG conducted the validation activities as outlined in the CMS performance measure validation protocol. To complete the validation activities for Peach State, HSAG obtained a list of the performance measures that were selected by DCH for validation.

⁵ HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

⁶ NCQA HEDIS Compliance Audit™ is a trademark of the National Committee for Quality Assurance (NCQA).

HSAG then prepared a document request letter that was submitted to Peach State outlining the steps in the performance measure validation process. The document request letter included a request for source code for each performance measure, a completed MY 2020 Information Systems Capabilities Assessment Tool (ISCAT), and any additional supporting documentation necessary to complete the audit. The letter also included an introduction to the medical record review validation (MRRV) process; a timetable for completion; and instructions for submission. HSAG responded to ISCAT-related questions received directly from Peach State during the pre-audit phase.

Approximately one month prior to the virtual audit review, HSAG provided Peach State with an agenda describing all virtual audit review activities and indicating the type of staff needed for each session. HSAG also conducted a pre-audit review conference call with Peach State to discuss review logistics and expectations, important deadlines, outstanding ISCAT documentation, and any questions from Peach State regarding the process.

Validation Team

The HSAG Performance Measure Validation Team was composed of a lead auditor and several validation team members. HSAG assembled the team based on the skills required for the validation and requirements of Peach State. Some team members, including the lead auditor, participated in the virtual meetings with Peach State; others conducted their work at HSAG’s offices. Table 3 lists the validation team members, their roles, and their skills and expertise.

Table 3—Validation Team

Validation Team Member	Role/Skills/Expertise
Thomas D. Miller, MA, CHCA <i>Lead Auditor</i>	Lead auditor, Certified HEDIS Compliance Auditor (CHCA), multiple years of auditing experience, HEDIS and performance measure knowledge, and statistics and analysis background.
Tammy GianFrancisco, CHCA <i>Project Manager, DSAA</i>	Project Manager—Daily management of audit operations, including audit deliverables and timelines.
Advanced Analytics	Analytic Team—Provides analytic support, including source code review.

Technical Methods of Data Collection and Analysis

The CMS performance measure validation protocol identifies key types of data that should be reviewed as part of the validation process. The following list describes the type of data collected and how HSAG conducted an analysis of these data:

- **MY 2020 ISCAT:** Peach State completed and submitted the required and relevant portions of its - ISCAT for HSAG’s review. HSAG used responses from the ISCAT to complete the pre-audit assessment of information systems.

- **Medical record documentation:** Peach State completed the medical record section within the ISCAT. In addition, Peach State submitted the following documentation for review: medical record hybrid tools and instructions, training materials for medical record review (MRR) staff members, and policies and procedures outlining the processes for monitoring the accuracy of the reviews performed by the review staff members.
- **Source code (programming language) for performance measures:** Peach State was required to submit the source code used to calculate the performance measures under review by HSAG. HSAG reviewed the source code and performance measure generation process to ensure compliance with the measure specifications required by DCH.
- **Supporting documentation:** HSAG requested documentation that would provide reviewers with additional information to complete the validation process, including policies and procedures, file layouts, system flow diagrams, system log files, and data collection process descriptions. HSAG reviewed all supporting documentation, identifying issues or areas needing clarification for further follow-up.
- **Rate review:** Upon receiving the calculated rates from Peach State, HSAG conducted a review on the reasonableness and integrity of the rates. The review included trending with prior year's rates and comparison of rates across all CMOs.

Virtual Review Activities

HSAG conducted a virtual audit review with Peach State on March 31, 2021. HSAG collected information using several methods, including interviews, system demonstrations, review of data output files, primary source verification, observation of data processing, and review of data reports. The virtual site visit activities are described as follows:

- **Opening meeting:** The opening meeting included an introduction of the validation team and key Peach State staff members involved in the performance measure validation activities. The review purpose, the required documentation, basic meeting logistics, and queries to be performed were discussed.
- **Evaluation of system compliance:** The evaluation included a review of the information systems, focusing on the processing of claims and encounter data, provider data, patient data, and inpatient data. Additionally, the review evaluated the processes used to collect and calculate the performance measure rates, including accurate numerator and denominator identification and algorithmic compliance (which evaluated whether rate calculations were performed correctly, all data were combined appropriately, and numerator events were counted accurately).
- **Review of ISCAT and supporting documentation:** The review included processes used for collecting, storing, validating, and reporting performance measure rates. This session was designed to be interactive with key Peach State staff members so that HSAG could obtain a complete picture of all the steps taken to generate the performance measure rates. The goal of the session was to obtain a confidence level as to the degree of compliance with written documentation compared to actual processes. HSAG conducted interviews to confirm findings from the documentation review, expand

or clarify outstanding issues, and ascertain that written policies and procedures were used and followed in daily practice.

- Overview of data integration and control procedures:** The overview included discussion and observation of source code logic, a review of how all data sources were combined, and a review of how the analytic file was produced for the reporting of selected performance measure rates. HSAG performed primary source verification to further validate the output files, reviewed backup documentation on data integration, and addressed data control and security procedures. HSAG also reviewed preliminary rates during this session, if available.
- Closing conference:** The closing conference included a summation of preliminary findings based on the review of the ISCAT and the virtual audit review, and revisited the documentation requirements for any post-audit review activities.

HSAG conducted several interviews with key Peach State staff members who were involved with performance measure reporting.

Table 4 displays a list of key Peach State interviewees:

Table 4—List of Peach State Health Plan Interviewees

Name	Title
Michael D. Strobel	Vice President (VP), Quality Improvement
Sonji Barnes	Supervisor, Quality Improvement
Monet Harrell	Manager, Quality Improvement Analytics
Claudette Bazile	VP, Compliance
Christopher G. Wilde	Senior Manager, Compliance
Tawonna Ingram	Senior Director, Quality Improvement
Jonathan Pittman	Senior Auditing Analyst, MED Quality Improvement
Patricia E. Elder	Director, Compliance
Travis Brice	Senior Director, Customer Service
Kelly McNamara	Manager, Delegation Oversight
Carmen R. Vinyard	Business Analyst III
Sonya Cuffie	VP, Finance
Laquanda Brooks	Senior VP, Population Health
Urcel Fields	Chief Operating Officer
Tyrone Ledbetter	Quality and Compliance Analyst
Guilherme Alves	Data Analyst IV
Carla M. Simmons	Manager, Provider Data Management
Dr. James A. Richardson	Chief Medical Director

Chunzi Peng	Business Analyst III
Theodore Hudson	Director, Audit, MED Quality Improvement
Danny Sharpe	Senior Director, Outcomes Research and Analytics
Annette L. Zerbe	VP, Compliance
Keith Caldwell	VP, Business Systems and Data Management
Lasha Moore	Account Manager
Brian Buller	Director, Compliance
Lakeisha Moore	Director, Customer Service
Geoffrey Harrell	Data Analyst III
Edna Salamo	Director, Provider Data and Analytics
Chevron Cardenas	VP, Operations
Debra Peterson-Smith	Plan Chief Performance Officer
Melveta Hill-Sims	Manager, Quality Improvement
Robert J. Friedrichs	Plan Chief Financial Officer
Lakesha M. Davis	Director, Claim and Contract Support Services
Audrey L. French	Supervisor, Claims
Brittney Mathis	Senior Director, Provider Network Performance and Communication
Tammy R. McCord	Lead Claims Analyst
Becky M. Elliott	Lead Claims Analyst
Kevin G. Kruse	Supervisor, Claims
Mamiel McMichael	VP, Operations
Amie Brooks	Manager, Eligibility and System Configuration
Glenda Broadnax-McCoy	Director, Claims Operations
Markeya Baskerville	Supervisor, Claims
Brian Snyder	Senior Director, Enterprise Data Solutions
Heather A. Jones	Senior Business System Analyst (Core Systems)
Ryan Spees	Project Lead Application Software Engineer
William W. Aitch	Application Software Engineer
Dalton Holt	Manager, Information Technology
Major Cole	Data Analyst II
Shawn C. Bridges	Manager, Data Analysis

Data Integration, Data Control, and Performance Measure Documentation

There are several aspects crucial to the calculation of performance measure rates. These include data integration, data control, and documentation of performance measure rate calculations. Each of the following sections describes the validation processes used and the validation findings. For more detailed information, see Appendix A of this report.

Data Integration

Accurate data integration is essential for calculating valid performance measure rates. The steps used to combine various data sources (including claims/encounter data, eligibility data, and other administrative data) must be carefully controlled and validated. HSAG validated the data integration process used by Peach State, which included a review of file consolidations or extracts, a comparison of source data to warehouse files, data integration documentation, source code, production activity logs, and linking mechanisms. Overall, HSAG determined that the data integration processes in place at Peach State were:

- Acceptable
- Not acceptable

Data Control

Peach State's organizational infrastructure must support all necessary information systems; and its quality assurance practices and backup procedures must be sound to ensure timely and accurate processing of data, and to provide data protection in the event of a disaster. HSAG validated the data control processes Peach State used which included a review of disaster recovery procedures, data backup protocols, and related policies and procedures. Overall, HSAG determined that the data control processes in place at Peach State were:

- Acceptable
- Not acceptable

Performance Measure Documentation

Sufficient, complete documentation is necessary to support validation activities. While interviews and system demonstrations provided supplementary information, the majority of the validation review findings were based on documentation provided by Peach State. HSAG reviewed all related documentation, which included the completed ISCAT, job logs, computer programming code, output files, workflow diagrams, narrative descriptions of performance measure calculations, and other related documentation. Overall, HSAG determined that the documentation of performance measure rate calculations by Peach State was:

- Acceptable
- Not acceptable

Validation Results

HSAG evaluated Peach State's data systems for the processing of each data type used for reporting DCH performance measure rates. General findings are indicated below.

Medical Service Data (Claims and Encounters)

There were no concerns with Peach State's claims and encounter system or processes. Peach State's transactional systems, AMISYS, had sufficient edits in place during pre-, concurrent, and post-processing of claims and encounters. Additionally, there were no system changes or conversions implemented by the CMO in 2020.

Overall, nearly all (i.e., 98 percent) of the claims received in 2020 were submitted electronically via electronic data interchange (EDI) files (i.e., 96 percent) or direct submission via Peach State's Web portal (i.e., 2 percent) while only 2 percent of claims were submitted by paper. Paper claims were received through its corporate document management system and scanned into the Centene Process Automation System (CENPAS) to be processed by claims staff responsible for verifying claim text or keying information. Paper claims that failed the process were routed to claims examiners trained on multiple markets for data entry into the system. Once entered, paper claims were transformed into standard EDI files to support downstream processing and adjudication. Electronic EDI claims were submitted to and processed by contracted clearinghouses prior to intake and loading into AMISYS. Regardless of submission method, all claims were processed via Edifecs and underwent a series of validations—i.e., HIPAA compliance, claim level validation, and business logic validation. Once submitted claims were validated for compliance against the national standards, each passed claim was loaded to AMISYS for adjudication. The pre-processing edits ensured the claims contained valid codes, member, and provider information. Market-specific business rules were applied to claims, as applicable. All claims were tracked from the point of receipt until they were loaded into AMISYS; with Peach State conducting daily, weekly, and monthly audits to ensure claims were processed accurately. In 2020, Peach State maintained a high level of financial and payment accuracy (i.e., 99.3 percent and 98.6 percent, respectively). Peach State continued to have very little manual intervention for claims processing with an auto-adjudication rate of 91.8 percent in 2020 for its Georgia market. Most of the manual steps in processing were due to high-dollar claims that required supervisor approval. As in previous audits, Peach State did not use any nonstandard coding during the measurement year.

Peach State's AMISYS system captured primary, secondary, and modifier codes appropriately. Coding updates to the AMISYS system were made annually to ensure the most recent coding schemes were captured. All of Peach State providers continued to be reimbursed based on an FFS payment model, although some primary care providers (PCPs) received an administrative fee.

Peach State also captured ancillary service data from external vendors including pharmacy, dental, and vision to support performance measure reporting. Vendors submitted data to Peach State regularly, and was tracked and trended to ensure files were complete and accurate. Adjudicated claims were submitted as encounters and received electronically and underwent front-end edits to assess accuracy of incoming

files and monitor the completeness of data. A series of bi-weekly and monthly reports were generated to track data loads, file rejections, and reconciliation with cash disbursement. Additionally, the CMO conducted monthly and quarterly meetings with vendors as well as performing an annual audit. Peach State's oversight of this process ensured that all relevant data were captured prior to measure production.

In 2020, Peach State achieved 96.35 percent accuracy in its encounter submissions and greater than 99 percent completeness based on the latest Myers & Stauffer reconciliation report. Once claims were processed in AMISYS, extract, transform, and load (ETL) procedures were used to load data into Peach State's Enterprise Data Warehouse (EDW). Then, based on scheduled or manual requests, ETL processes transferred data to Peach State's Encounter Data Manager (EDM) to transform data into standard X12 transaction files and performed validation checks prior to submitting the data to DCH. Ancillary vendor data was submitted to the encounter data team and passed through as X12 transaction files to the State. Peach State sent all required medical, dental, vision, and pharmacy encounters to the DCH/ Gainwell Technologies (Gainwell) in alignment with DCH encounter reporting requirements.

Based on its review of ISCAT responses, audit interviews, and a virtual demonstration, HSAG confirmed that core information systems captured appropriate, standard coding schemes as required for reporting.

Enrollment Data

There were no concerns with Peach State's membership and enrollment data systems or processes. Peach State's enrollment system, the Unified Member View (UMV), a component system of the AMISYS transactional system, was used as the system of record for enrollment and eligibility information. No system changes or conversions were implemented by the CMO in 2020. Peach State experienced an increase of nearly 25 percent in its Georgia Families Medicaid population between January and December due to a relaxation of eligibility requirements in response to the coronavirus (COVID-19) pandemic. Membership trends were reviewed and discussed during the audit and were consistent with expectations.

The daily 834 enrollment files were received electronically from the State's enrollment broker, Gainwell in addition to a full monthly reconciliation and end-of-month file. The daily files included member additions, deletions, and modifications. The CMO checked the files for compliance and reconciliation reports were produced to ensure the completeness and accuracy of transmission. Following initial validation checks, Peach State transformed the daily and monthly EDI files for loading into UMV, and performed a series of validation and quality checks on the incoming data. The CMO also checked the files for compliance and reconciliation reports were produced to compare file counts received from the State versus loaded into the system. Any identified errors were researched and corrections were made directly in UMV. Peach State performed monthly reconciliation of enrollment data to ensure all member information was complete and accurate. Additionally, Peach State submitted enrollment files to its external vendors for processing. UMV continued to maintain all enrollment data for MY 2020. Once processed in UMV, enrollment data was loaded into AMISYS. Peach State also transmitted enrollment data to downstream vendors and delegated entities on a timely basis to support member services.

In addition to the unique Medicaid identification (ID) assigned by Gainwell and included in daily/monthly 834 EDI files, Peach State also assigned a unique member ID number to new members upon processing in UMV. Members that were previously entered into UMV had information updated to avoid duplicating entries.

Peach State conducted appropriate oversight of the enrollment process through ongoing internal audits and communication with the State enrollment authority. Peach State's UMV and AMISYS systems captured all relevant fields from the State's enrollment files and continued to monitor the quality and completeness of data.

Provider Data

There were no concerns with Peach State's provider data systems or processes. Peach State's provider system, Portico, was used to process and store key provider demographic information and supported provider enrollment and contracting processes, including the capture of key provider data elements—i.e., board certification and specialties, affiliation, and contract details. Provider information was extracted from Portico and loaded to AMISYS through scheduled ETL processes nightly. While data in both systems were linked by a unique provider identification number, the flow of provider data was one-way from Portico to AMISYS. Reconciliation of provider data between the systems was based on weekly discrepancy reports which were “worked” to ensure equivalence between the two systems.

Peach State demonstrated the Portico and AMISYS provider systems during the virtual audit review and HSAG verified that both systems accurately captured key provider characteristics, including specialty. HSAG found Peach State to be compliant with the credentialing and assignment of individual provider specialties in both systems.

Medical Record Review Validation (MRRV)

There were no concerns with Peach State's MRR policies and procedures. Peach State had well-established MRR processes and qualified internal staff performing MRR abstraction under experienced supervision. HSAG notified Peach State on February 15, 2021, that convenience sample validation was required for the one hybrid measure, *Developmental Screening in the First Three Years of Life*. All selected records met validation requirements; no issues were identified.

HSAG confirmed that Peach State sampled according to CMS Core Set sampling guidelines. Peach State chase logic was reviewed and determined to be appropriate across the hybrid measure. MRR policies and procedures indicated that clinical quality staff and MRR abstractors underwent annual training and abstractions were regularly overread by experienced nurses.

Similar to past years, the MCO contracted with Change HealthCare to support chase, procurement, and abstraction activities while internal staff conducted quality assurance oversight in MY 2020. All qualified staff members were trained in the *Developmental Screening in the First Three Years of Life* CMS Core Set specifications and in the use of Change Healthcare's Chart Abstraction Operations (CAO) tool used in conjunction with Inovalon's abstraction tool (i.e., Quality Spectrum Hybrid Reporter

[QSHR]) to manage and accurately conduct MRR and oversight. HSAG’s clinical team reviewed Change Healthcare’s hybrid tool and participated in a live demonstration of the MRR application to determine compliance with audit standards. HSAG approved the tool for use in MY 2020.

Peach State completed MRR and submitted final counts on May 7, 2021. Peach State passed the final MRRV for the *Developmental Screening in the First Three Years of Life* measure; individual results are presented in Table 5.

Table 5—MRRV Results for Peach State Health Plan

Performance Measure	Sample Size	Status	Final Results
<i>Developmental Screening in the First Three Years of Life—Georgia Families Medicaid</i>	8	Pass	No critical errors were confirmed.
<i>Developmental Screening in the First Three Years of Life—Peach Care for Kids[®]</i>	8	Pass	No critical errors were confirmed.

Supplemental Data

Supplemental data validation was not under the scope of the PMV audit. However, processes to incorporate vendor data were identified and reported in the Medical Service Data section.

Data Integration

There were no concerns with Peach State’s data pre-production, data integration, and reporting processes. Peach State continued to use Inovalon software, Quality Spectrum Insight (QSI[®]-XL) for performance measure production. Peach State described its processes thoroughly and confirmed that there were no significant changes to its systems and protocols since the prior year.

AMISYS continued to serve as the source of data for the EDW use to support measure production and reporting. Peach State used SQL Server Integration Services (SSIS) packages to extract data from the EDW via ETL processes to staging tables where data were transformed into QSI-XL proprietary layouts. Validation reports were generated to ensure file format and size, record counts, and field transformations were compliant with requirements. In case of any issues in the loading process, notifications were sent to the responsible business users for examination. Peach State also had a robust quality control process in place to track the data load process for all sources. Once validated, data were zipped and uploaded into QSI-XL. Peach State provided a thorough explanation of the data flow process within its systems.

Peach State continued to contract with Inovalon to support the calculation of the non-HEDIS, CMS Core Set measures within the scope of HSAG’s audit. Inovalon was responsible for maintaining all aspects of the QSI-XL application. Peach State consistently reviewed the data quality reports from QSI-XL to ensure all data were captured and that the CMO followed up on all data errors. Peach State had a two-step validation process that logged records submitted with the file name and record counts. Files with the same name were matched against each other to determine if the record counts matched. The second-

tier validation was conducted to determine error counts and error reasons. In coordination with Peach State and Inovalon, HSAG coordinated a virtual review of all source code used to generate the performance measures. HSAG evaluated the code to ensure compliance with the measure specifications required by the State; all source code was approved. Peach State conducted a full refresh of data rather than incremental data loads to ensure all changes were captured. Peach State’s corporate team, Centene, ran monthly reports from Inovalon’s software to review data regularly. Centene frequently produced month-over-month comparison reports to ensure data were complete and accurate.

During the virtual audit review, HSAG performed PSV on the following measures—i.e., CDF, PDENT, and PQI-08. HSAG reviewed members’ source data to confirm the eligibility, provider specialty, and services performed (at least five records per measure) for each selected measure. Additional follow-up was required after the virtual audit review and Peach State uploaded additional documentation to support the inclusion of selected PSV cases. All documentation and screenshots demonstrated compliance.

Peach State submitted final rates in June which were benchmarked, trended, and reviewed. Follow-up was conducted and questions were successfully resolved. All measure rates were designated reportable.

Performance Measure Specific Findings

Based on all validation activities, HSAG determined validation results for each performance measure rate. HSAG provided an audit result for each performance measure as defined in Table 6.

Table 6—Audit Results and Definitions for Performance Measures

Reportable (R)	Measure data were compliant with the specifications required by the state.
Do Not Report (DNR)	Measure data were materially biased.

According to the CMS protocol, the audit result for each performance measure rate is determined by the magnitude of the errors detected for the audit elements, not by the number of audit elements determined to be noncompliant based on the review findings. Consequently, an error for a single audit element may result in a designation of “DNR” because the impact of the error associated with that element biased the reported performance measure rate by more than 5 percentage points. Conversely, it is also possible that several audit element errors may have little impact on the reported rate, leading to an audit result of “R.”

Table 7 displays the key review findings and final audit results for Peach State for each performance measure rate. For additional information regarding performance measure rates, see Appendix C of this report.

Table 7—Key Review Findings and Audit Results for Peach State Health Plan

Performance Measures		Population	Key Review Findings	Audit Results
1	<i>Developmental Screening in the First Three Years of Life</i>	GF	No concerns.	R
2	<i>Developmental Screening in the First Three Years of Life</i>	PeachCare for Kids®	No concerns.	R
3	<i>Diabetes Short-Term Complications Admission Rate</i>	GF	No concerns.	R
4	<i>Heart Failure Admission Rate</i>	GF	No concerns.	R
5	<i>Live Births Weighing Less Than 2,500 Grams</i>	GF	No concerns.	R
6	<i>Live Births Weighing Less Than 2,500 Grams</i>	PeachCare for Kids®	No concerns.	R
7	<i>Percentage of Eligibles Who Received Dental Services</i>	GF	No concerns.	R
8	<i>Screening for Depression and Follow-Up Plan</i>	GF	No concerns.	R
9	<i>Screening for Depression and Follow-Up Plan</i>	PeachCare for Kids®	No concerns.	R

Data Integration and Control Element	Met	Not Met	N/A	Comments
Accuracy of data transfers to assigned performance measure data repository.				
The CMO accurately and completely processes transfer data from the transaction files (e.g., membership, provider, encounter/claims) into the performance measure data repository used to keep the data until the calculations of the performance measure rates have been completed and validated.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Data used to calculate performance measures were captured and stored in Peach State’s core system, AMISYS. Production data were copied into Peach State’s corporate EDW prior to transferring data to the QSI-XL measure platform.
Samples of data from the performance measure data repository are complete and accurate.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
Accuracy of file consolidations, extracts, and derivations.				
The CMO’s processes to consolidate diversified files and to extract required information from the performance measure data repository are appropriate.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
Actual results of file consolidations or extracts are consistent with those that should have resulted according to documented algorithms or specifications.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
Procedures for coordinating the activities of multiple subcontractors ensure the accurate, timely, and complete integration of data into the performance measure database.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
Computer program reports or documentation reflect vendor coordination activities, and no data necessary for performance measure reporting are lost or inappropriately modified during transfer.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.

Data Integration and Control Element	Met	Not Met	N/A	Comments
If the CMO uses a performance measure data repository, its structure and format facilitates any required programming necessary to calculate and report required performance measure rates.				
The performance measure data repository’s design, program flow charts, and source codes enable analyses and reports.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
Proper linkage mechanisms are employed to join data from all necessary sources (e.g., identifying a member with a given disease/condition).	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
Assurance of effective management of report production and of the reporting software.				
Documentation governing the production process, including CMO production activity logs and the CMO staff review of report runs, is adequate.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
Prescribed data cutoff dates are followed.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
The CMO retains copies of files or databases used for performance measure reporting in case results need to be reproduced.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
The reporting software program is properly documented with respect to every aspect of the performance measure data repository, including building, maintaining, managing, testing, and report production.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.
The CMO’s processes and documentation comply with the CMO standards associated with reporting program specifications, code review, and testing.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Compliant; no issues or concerns.

Reviewers:	Thomas D. Miller, MA, CHCA

Table B-1—Denominator Validation Findings for Peach State Health Plan

Audit Element	Met	Not Met	N/A	Comments
For each of the performance measures, all members of the relevant populations identified in the performance measure specifications are included in the population from which the denominator is produced.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
Adequate programming logic or source code exists to appropriately identify all relevant members of the specified denominator population for each of the performance measures.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
The CMO correctly calculates member months and member years if applicable to the performance measure.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
The CMO properly evaluates the completeness and accuracy of any codes used to identify medical events, such as diagnoses, procedures, or prescriptions, and these codes are appropriately identified and applied as specified in each performance measure.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
If any time parameters are required by the specifications of the performance measure, they are followed (e.g., cutoff dates for data collection, counting 30 calendar days after discharge from a hospital).	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
Exclusion criteria included in the performance measure specifications are followed.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
Systems or methods used by the CMO to estimate populations when they cannot be accurately or completely counted (e.g., newborns) are valid.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.

Table B-2—Numerator Validation Findings for Peach State Health Plan

Audit Element	Met	Not Met	N/A	Comments
The CMO uses the appropriate data, including linked data from separate data sets, to identify the entire at-risk population.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
Qualifying medical events (such as diagnoses, procedures, prescriptions, etc.) are properly identified and confirmed for inclusion in terms of time and services.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
The CMO avoids or eliminates all double-counted members or numerator events.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
Any nonstandard codes used in determining the numerator are mapped to a standard coding scheme in a manner that is consistent, complete, and reproducible, as evidenced by a review of the programming logic or a demonstration of the program.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
If any time parameters are required by the specifications of the performance measure, they are followed (i.e., the measured event occurred during the time period specified or defined in the performance measure).	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Source code was approved; no issues or concerns.
