

## Epidemiologist 2-Trauma Registry Division of Public Health Epidemiology and State Laboratory

### Job Description

The Georgia Department of Community Health, Division of Public Health is seeking an Epidemiologist 2 within the Office of Epidemiology, Evaluation & Health Information –Trauma Registry.

Under general supervision, the incumbent will serve as an epidemiologist with the Trauma Registry with responsibilities for managing this information system, accessing the data in it, and using it to produce timely, accurate figures, fact sheets, and summaries.

The successful candidate will be responsible for:

- Independently querying the Georgia Trauma Registry and additional resources, and developing a process for regular analysis, reporting and dissemination of trauma data
- Completing routine monthly, quarterly and annual reports, graphs, charts, spreadsheets and publications summarizing and presenting descriptive analysis of injury data
- Regularly providing this information to the Georgia Trauma Care Network Commission and the DHR Office of Preparedness
- Participating in formulation of long- and short-range plans, policies, and strategies for trauma surveillance
- Ensuring that district and county health officials and other appropriate personnel receive information and reports relevant for their jurisdictions
- Providing accurate and timely information for response to media requests to keep the public informed of disease and injury control and prevention
- Performing various other epidemiologic duties in support of Trauma Registry operations.

### Qualifications

Completion of a Masters degree in Public Health or a closely related field and two years of experience performing epidemiologic work or work in a closely related field

OR Completion of a Bachelors degree AND three years of experience performing epidemiologic work or work in a closely related field

### Preferred Qualifications

- Competence in using SAS with at least 2 years of SAS programming experience
- Previous experience using relational databases such as Access
- Previous experience with managing, matching, and merging databases
- Previous epidemiological experience working with trauma registry or injury surveillance data.
- Experience and competence in conducting public health surveillance, analyzing epidemiologic data, and reporting analytic results.
